

POLICE END UNION RIOT

Miners' Factions Wage Battle

Twenty-two Arrested When Lewis Adherents Clash With "Communists"

Pittsburgh Outbreak Blamed on Organization Head; Four Men Injured

PITTSBURGH, Sept. 9. (P)—Responding to a riot call, following a clash between contending factions of the united mine workers in which four men were injured, one perhaps fatally, police today disbanded the scheduled meeting of the "national miners' convention" committee, called for the avowed purpose of ousting the "reactionary machine" of President John L. Lewis and creating a new union.

Twenty-two men, said to represent both sides, were arrested and held on charges of rioting. They will be arraigned tomorrow. Among them is Anthony Minerich, one of the leaders of the arrangement.

FARM DOLLAR BUYS MOST

Rural Worker Has Advantage Over City Employee, Bureau of Economic Survey Shows

NEW YORK, Sept. 9. (P)—The farm hand's dollar has the most purchasing power and the "urban employee's" the least out of a division of the American population into five statistical groups in a cost of living report made public today by the National Bureau of Economic Research. The figures are estimates for January 1, 1923, and the comparison is with the dollar's purchasing power in 1913.

The other three classes are farm—low level, with the result that the dollar's purchasing power has been pulled down. Low-priced farm products have tended also to bring about cheap board for agricultural employees and hence the index number for this class has likewise been kept at a low level.

The divergence from the United States Bureau of Labor Statistics cost of living index of the index series representing expenditures of the wealthier classes is mainly due to the fact that the index numbers for the classes having higher incomes weigh more heavily upon such items as tuition, room and board at college, hotel bills, fur, diamonds, railway passenger fares, servants' wages, theater seats, pianos and expensive automobiles, and hence the index number for this class has likewise been kept at a low level.

Several Chicago attorneys are preparing one test case and it is expected that several of the new assignments will lead to the courts soon after the station management learns that they have drawn inferior channels or must suffer severe curtailment of their operating hours.

That is how the commission has met the demand of Congress that there be an equalization of radio facilities among the five zones and among the states within those zones on the basis of their relative populations. Where a station escapes the necessity of making any change in its frequency or power, it is considered to be in a fortunate circumstance. There are few cases of this.

The Chicago station reported about the court is WMBZ-WOK, the 5000-watt station of the American Bond and Mortgage Company, which was ordered to quit the air.

Under the new allocation, details of which are not to be made public for twenty-four more hours, the wave length to be used by two stations will be changed by two.

With regard to the reallocation plan itself—and it represents the most important and far-reaching action of the Federal Radio Commission since that body's inception—only this much can be divulged:

About sixty stations with powers ranging from 1000 to 50,000 watts have been placed in the fourth zone, but the stations will be spaced far enough apart geographically (from 1000 to 1500 miles) to preclude interference.

Four channels at the extreme lower end of the broadcast band have been placed on the thirty-four regional channels. On these also there will be much time sharing, especially in the fourth zone, but the stations will be spaced far enough apart geographically (from 1000 to 1500 miles) to preclude interference.

With regard to the reallocation plan itself—and it represents the most important and far-reaching action of the Federal Radio Commission since that body's inception—only this much can be divulged:

RADIO FIGHT FOR COURT

Tests Impend on New Rulings

Chicago Attorneys Already Preparing One Case for Legal Showdown

Commission Will Welcome Battle in Attempt to Clear Up Powers

(Copyright, 1934, by the North American Newspaper Alliance)

WASHINGTON, Sept. 9. (Exclusive)—On the eve of the announcement of the broadcasting reallocation, legal action to test the validity of certain phases of the radio law and some of the orders of the Federal Radio Commission looms as a certainty.

Several Chicago attorneys are preparing one test case and it is expected that several of the new assignments will lead to the courts soon after the station management learns that they have drawn inferior channels or must suffer severe curtailment of their operating hours.

Under the new allocation, details of which are not to be made public for twenty-four more hours, the wave length to be used by two stations will be changed by two.

With regard to the reallocation plan itself—and it represents the most important and far-reaching action of the Federal Radio Commission since that body's inception—only this much can be divulged:

About sixty stations with powers ranging from 1000 to 50,000 watts have been placed in the fourth zone, but the stations will be spaced far enough apart geographically (from 1000 to 1500 miles) to preclude interference.

Four channels at the extreme lower end of the broadcast band have been placed on the thirty-four regional channels. HOOVER AWAITS MAINE RETURNS

Making Intensive Survey of New England Situation

Report to Be Given Coolidge on Return Wednesday

Stress to Be Laid on Getting Out Entire Vote

BY ROBERT B. ARMSTRONG
"Times" Staff Correspondent

WASHINGTON, Sept. 9. (Exclusive)—Herbert Hoover is personally getting a close intensive survey of the entire New England situation to lay before President Coolidge upon the latter's return to Washington Wednesday.

In addition to watching the returns from the Maine election to be held tomorrow, Hoover is planning to get the last X-ray on Massachusetts tomorrow. He has arranged personal conferences during the day with Louis K. Liggett, Republican national committeeman from Massachusetts; John Richardson, his predecessor in that office; and the Lapland and Arthur G. Artie, pursuer, who hurried down to the gangplank to bid her good-by, inadvertently let the cat out of the bag. "Oh, it shan't be before Christmas, anyway," she replied to their inquiry. And then she frowned as she realized that the reporters had overheard.

THRILLING THOUGHT
"Perhaps at the White House?" ventured one of the interviewers. "That would be thrilling," she smiled. But again she frowned as she added, "However, there's not much chance of that."

She then admitted that, when the wedding does take place, there'll be no European honeymoon.

Nor has she any preference for a honeymoon of European design, she said, explaining that her only purchases abroad were "a few necessary things, but not for a trousseau."

Miss Trumbull, dressed in a black and white ensemble suit, chic French black felt hat, flesh-colored hose and black satin slippers, reluctantly consented to pose for cameramen while she answered questions. She is glad, she said, to learn that her fiancé has agreed to take a position with the New York, New Hampshire and Hartford Railroad, at the bottom of the ladder—in the freight department.

GOV. SMITH TO TRAVEL FIRST CLASS

Elaborate Train to Be Home of Governor When He Starts Next Sunday

ALBANY (N. Y.) Sept. 9. (P)—When Gov. Smith sets out on his campaign travels a week from tonight he will be aboard an eleven-car special train, fitted out elaborately for the comfort of the Democratic Presidential nominee and his party.

The Governor, several members of his family and a group of friends, and personal advisers will be quartered in the last two cars, the rear one an observation coach.

Approximately forty newspaper correspondents will be on the train. The train, which is being made up by the New York Central, will leave New York City at 8:15 p.m. next Sunday, stopping at Albany for an hour to take on the nominees and members of his party. It will leave Albany for the West at 10:30 p.m., Eastern Standard Time.

W.C.T.U. Names Its Committees

TULARE, Sept. 8.—Organizing its various departments for the coming year, the Tulare branch of the Women's Christian Temperance Union has announced the following committee chairmen: Social morality, Mrs. Ella Stiles; child welfare, Mrs. Mildred Slaughter; red-letter days, Mrs. Alice Hill and F. E. Beards; mission and temperance, Mrs. A. L. Purcell; soldiers and sailors, Mrs. Ethel Hubbard; racial groups, Rosa Gorder; legislation and law enforcement, Mrs. C. W. Cobb; evangelism, Mrs. Belle Nichols; flower mission, Mrs. W. Zartman, Mrs. Purcell and Hill; Union, Mrs. Rosa Hamilton; scientific temperance instruction and antiradicals, Mrs. Adele Slaughter; Sunday school and temperance, Mrs. Carrie McDaniel; mothers' meeting and white-ribbon recruits, Mrs. Florence Round; institute, Mrs. R. C. Crowell; music, Mrs. G. F. Watson; plan, Mrs. Anna L. Trader; program, Mrs. Mary McMillan, C. H. Slaughter, C. W. Cobb, Ethel Hubbard and Carrie McDaniel. The coming political campaign has been assigned as the topic of the next meeting.

TULARIANS CONDEMN ANTI-RODDEO MEASURE

TULARE, Sept. 8.—The Tulare Chamber of Commerce has gone on record, through its executive committee, as condemning the measure known as the anti-roddeo bill No. 21 on the November ballot. This action was taken following denunciations of the bill by A. J. Elliot, manager of the live-stock department of the Tulare County Fair, who asserted that it would "mess up" the business of everyday activities of hog raisers and stock men.

JOHN'S "GIRL" TELLS SECRET

Florence Trumbull Admits Impending Marriage to Son of President Coolidge

NEW YORK, Sept. 9. (Exclusive)—Wedding bells may ring at the White House ere long.

Following a naive attempt to emulate the Coolidge policy of economy in the matter of speaking for publication, Florence Trumbull, daughter of Gov. Trumbull of Connecticut, finally admitted today that she and John Coolidge, son of the President, probably will be married before the end of the forthcoming winter.

Designed by reporters and cameramen aboard the incoming Red Star liner Lapland on her return from Europe, she first evaded direct replies with a noncommittal "We have no plans. I won't know anything until I get back and find out."

HAVE "UNDERSTANDING"
Later she conceded that she and young Coolidge, whose failure to greet her at the pier, incidentally, won for her two bets from fellow-passengers totaling \$150, have a "personal understanding."

"Perhaps reports of your engagement are a bit premature?" it was suggested.

"Yes, that's the word, premature," she hurriedly replied. And she hoped to let it go at that, but Commander Harvey, skipper of the Lapland, and Arthur G. Artie, pursuer, who hurried down to the gangplank to bid her good-by, inadvertently let the cat out of the bag. "Oh, it shan't be before Christmas, anyway," she replied to their inquiry. And then she frowned as she realized that the reporters had overheard.

THRILLING THOUGHT
"Perhaps at the White House?" ventured one of the interviewers. "That would be thrilling," she smiled. But again she frowned as she added, "However, there's not much chance of that."

She then admitted that, when the wedding does take place, there'll be no European honeymoon.

Nor has she any preference for a honeymoon of European design, she said, explaining that her only purchases abroad were "a few necessary things, but not for a trousseau."

Miss Trumbull, dressed in a black and white ensemble suit, chic French black felt hat, flesh-colored hose and black satin slippers, reluctantly consented to pose for cameramen while she answered questions. She is glad, she said, to learn that her fiancé has agreed to take a position with the New York, New Hampshire and Hartford Railroad, at the bottom of the ladder—in the freight department.

Draft Betrays Runaway Girls

EXETER (N. H.) Sept. 9. (Exclusive)—An attempt to cash a \$5 postal money order in a store here today accounted for the capture of two runaway schoolgirls. Marion Madigan, 15 years of age, of Brooklyn, and Mary Shapleigh, 14, of Buffalo. The girls vanished Tuesday evening from the Northfield Seminary, East Northfield, Mass., about 120 miles from here.

Through the efforts of the state police the girls were trailed into New Hampshire. The money order that betrayed the pair was drawn on Marion's mother, Mrs. Annie Mullen, a librarian of Brooklyn.

These Professional Services protect your real estate investment

Consult a "Realtor" whenever you buy, sell, subdivide, exchange or lease property. He will render these services:

Advise you regarding market values, legal technicalities, zoning and building restrictions, proposed legislation, rentals. Through reliable sources of authentic data and business surveys, and because of his specialized knowledge, experience and contacts, he can give you unprejudiced service.

PLATICAS DE LOS PUNES

Por el Profesor R. Guerrero
DEL DEPARTAMENTO ESPAÑOL DE "THE TIMES"

En el ejemplo 12 de la Plática anterior, dice "no vacila" en vez de "no vacila" en el 35, no debe haber hueco entre "lágrimas" y "los ojos".

Reemplazando por preposiciones los puntos suspensivos de las frases de la Plática precedente, quedan dichas frases como sigue: 1. Pedro Martínez fue ayer aprobado de médico (passed his examination, or qualified as). 2. Juan Monies se aprobó en teología la semana pasada (graduated in theology). 3. Este libro no es apropiado al estudio del inglés (not fit for the study of English). 4. Su conducta es la más apropiada para lograr lo que se ha propuesto (is the best calculated for attaining his purpose). 5. Felipe se apropió para sí todas las ganancias (converted to his own use). 6. Apropiósele a ese maestro, y tiró de las orejas (Draw near that big booby, or that lout, and). 7. Pierdes tu tiempo pidiéndole tal favor, pues no aprovechará en nada (will not avail nothing). 8. Estoy muy satisfecho con María, pues ha aprovechado mucho en ciencia doméstica (she has improved much in). 9. Debes aprovecharte de las circunstancias, hijo mío, y no dejar pasar tan bella ocasión de hacer dinero (you must make the most of the circumstances). 10. No le fue posible aproximarse a su casa, pues ésta se hallaba envuelta en llamas (wrapped up in flames). 11. No creía mi padre que fuera yo apto para la profesión de ingeniero, ni mucho menos para ganar dinero con ella (did not believe I was able, competent, fitted for). 12. Cuando se vea usted apurado de recursos, no vacile en acudir a mí (Whenever you be hard pressed for funds). 13. No se apure usted por tan poca cosa (Do not worry for so little). 14. He estado apurándole todo el día para que termine pronto (I have been hurrying him). 15. Hemos logrado que el enfermo se quiete con (por) la presencia de su madre (We made him quiet down by his mother's presence). 16. Los adversarios políticos no han podido quietarse en la enconada lucha que sostienen (it has not been possible for them to let up in the ranking struggle). 17. Yo he de seguir tal conducta aunque mis enemigos ardan de rabia (even if my enemies consume with rage). 18. Que se arda de coraje; bien merecido se lo tiene (Let him burn with anger; it serves him right). 19. La República Mexicana, así siempre ha estado ardiendo en guerras civiles (has been aflame or ablaze with civil war). 20. Ardía mi pobre amigo en deseos de vengarse, pues la afrenta había sido tan cruel como inmerecida (he was inflamed with the desire for revenge). 21. No me arguya de esa falta, querido hermano, pues no soy culpable de ella.

BOYS 2-PANTS SUITS \$15.

Why put clean oil in a dirty motor?

PAN-AM MOTOR CLEANING MACHINE

Osborne Process, U.S. Pat. No. 1633283—Other Patents Pending

...insures a cleaned motor, crankcase and oil lines for the clean oil because it loosens and removes carbon from under piston heads, and washes out every particle of grit, muck and metal filings that otherwise would remain to rob the fresh oil of a great part of its lubricating value.

Once-a-month use of the Pan-Am Motor Cleaning Machine on your car makes it possible to safely get 1,000 miles from each change of oil—especially since the Pan-Am Cleaning lubricant used in the machine is 100% lubricating oil and not a "cutting agent."

This, together with fewer repair bills, increased power and freedom from motor trouble, means a substantial monthly saving to motorists. The Pan-Am Motor Cleaning Machine service is FREE to users of Pan-Am Motor Oil.

If your dealer is not equipped to give this service, any Pan-American service station will gladly direct you to the place nearest to you where you can get it.

High compression motors find that PAN-GAS and PAN-AM Motor Oil are the ideal combination for 100% performance. PAN-GAS is a real anti-knock gasoline with "a barrel of pep in every gallon"—and PAN-AM Motor Oil maintains the "perfect seal for that barrel of pep."

BOY WITH APPETITE FOR PAINT SUCCUMBS TO LEAD POISONING

NEW YORK, Sept. 9. (Exclusive) John Hourcown, 5 years of age, died yesterday from lead poisoning. He insisted on eating the white lead paint from the windows of his parents' home despite attempts to dissuade him by painting the case-

ment with mustard, castor oil, and finally placing a muzzle over his face.

Warning to other parents whose children show a desire to lick white paint was made by Assistant Medical Examiner Gonzales.

"Frank connection between the underworld and police circles."

Names and addresses of persons in New York, Pittsburgh, Cleveland, Ocean Park, Cal., and many other cities were in the little book, which was seized during a raid last Friday.

Mr. Monaghan made the announcement after he had gone over a mass of evidence with Patrick J. McKewen, chief of county detectives, preparatory to the resumption tomorrow of the grand jury investigation of gangsters and their rackets.

The prosecutor said he had found in the little memorandum book a

ment with mustard, castor oil, and finally placing a muzzle over his face.

Names and addresses of persons in New York, Pittsburgh, Cleveland, Ocean Park, Cal., and many other cities were in the little book, which was seized during a raid last Friday.

Mr. Monaghan made the announcement after he had gone over a mass of evidence with Patrick J. McKewen, chief of county detectives, preparatory to the resumption tomorrow of the grand jury investigation of gangsters and their rackets.

The prosecutor said he had found in the little memorandum book a

Peach Growers Protest Price Paid by Cannery

MARYSVILLE, Sept. 9. (AP)—Representatives of eight different peach organizations met in Marysville this afternoon and issued a warning to all growers not to accept anything less than \$25 per ton for their peaches.

To accept \$20 would mean a loss of \$1,500,000 to the growers of Sutter, Yuba and Southern Butte counties, it is declared. This coming on the loss sustained last season by the growers would be a burden the peach industry cannot stand, it is said.

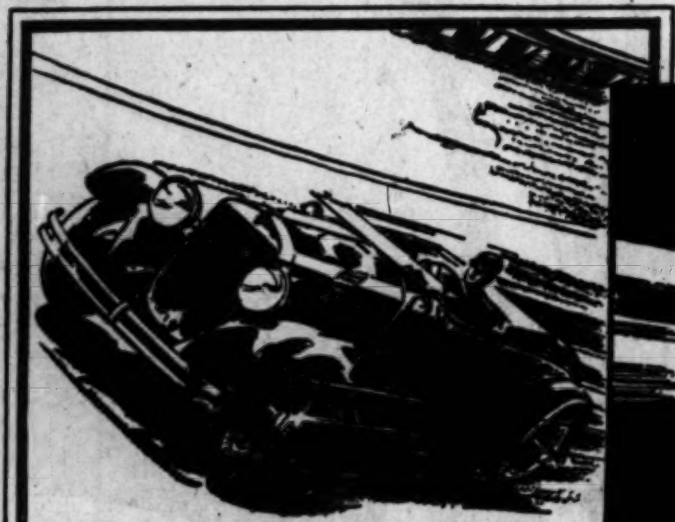

The meeting was called when it became known that some growers had received checks for \$20, but it is stated that the packing company issuing the checks had said an error was made and had recalled the checks.

LINCOLN EYRE DIES IN BERLIN

BERLIN, Sept. 9. (Exclusive)—Lincoln Eyre, New York Times correspondent at Berlin and one of the most popular American newspaper men in Europe, died in a Berlin hospital following an operation for appendicitis last Tuesday. Mr. Eyre had hardly recovered from a severe operation the first of the year when he was at death's door. So his enfeebled heart action had left him little resistance for the new blow.

JUDGE VAN ZANTE RETURNS HANFORD, Sept. 9.—Judge Van Zante, who has been holding court in Los Angeles for a month on assignment of the State Judicial Council, has returned and will resume the bench here Tuesday, the 11th inst.

STUDEBAKER President Eight

19 days

and

18 nights

of constant driving at better than

68 miles per hour

Greatest feat of endurance in all history

THINK of the joy of owning and driving such a motor car! And yet, but for pure chance, any one of the four new Studebaker President Eights used in this test would have gone to some Studebaker dealer—and you might have bought one of them!

For these cars were picked at random, off the assembly line, by American Automobile Association officials. Their motors were sealed. They were taken to Atlantic City Speedway. And there, on July 21, they leaped away at wide-open throttle, to crowd three years' mileage into 19 days and 18 nights!

Two roadsters, two sedans, as like as peas in a pod to those your Studebaker

dealer stands ready to take you riding in! The two roadsters averaged more than 68 miles per hour—30,000 miles in 26,329 consecutive minutes. And the last thousand miles were the fastest of all—71.6 and 69.6 miles an hour average. The sedans averaged 64.15 and 63.99 miles per hour for the 30,000 miles.

Not a drop of lubricant was added to their ball bearing shackles. And each car finished fit as a fiddle for thousands of added miles of trouble-free motoring!

STUDEBAKER
PRESIDENT EIGHT

TIMES WANT AD

TODAY IS

DOBBS DAY

IN LOS ANGELES

The Mullen and Bluett store at Sixth and Broadway is in gala attire today in celebration of Dobbs Day, an event of great importance to all well-dressed men. Dobbs Day inaugurates the week when men of this great California Southland may first inspect our complete assemblage of Autumn headwear created by America's foremost hatter.

In style, in quality, in variety of attractive textures and colors, Dobbs Hats stand as the supreme accomplishment of the art and science of hat manufacture. They are shown only by Mullen and Bluett in Los Angeles.

Our cordial invitation is extended to all of our friends to visit our display and its attendant exhibits. This invitation, of course, includes the ladies.

CROWD OF 85,000 SEES YANKS BEAT MACKS TWICE

WHO'S WHO with TROJAN GRID PROSPECTS BY BRAVEN DYER

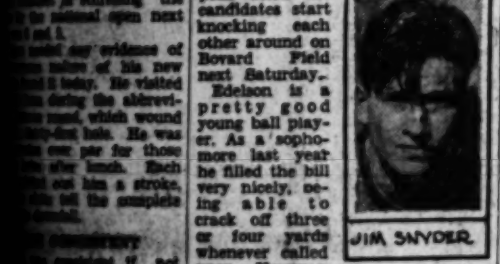

NO. 7.—THE FULLBACKS

Howard Jones sticks to his latest decision, Harry Edelson will play fullback for the Trojans this fall. During spring practice the Trojan mentor tried Edelson at inside halfback, using Jim Snider from the 1927 frosh, and several other recruits at fullback.

Since then Jones has decided to keep Edelson at his old position and let a flock of young men fight it out for the honor of bruising the opponent to one or more sides from the inside halfback berth. Therefore, at this writing, Edelson becomes the leading fullback. Whether he will remain so depends on what happens when the candidates start knocking each other around on Harvard Field next Saturday.

Edelson is a pretty good young ball player. As a sophomore last year he filled the bill very nicely, being able to crack off three or four yards whenever called upon. However, Harry suffered a knee injury during midseason, and was rendered practically useless for the rest of the season. He played some in the Notre Dame game, but was not his usual efficient self.

Edelson's tough luck was Don Moore's good fortune, for the former Los Angeles High boy slipped into the fullback post and made good with a bang. Loss of Moore due to scholarship difficulties is the toughest blow Jones has suffered in some months. Don would have "made" the 1928 Trojan team. Snider will undoubtedly be Edelson's understudy. It may be that in actual competition Jim will prove that he is just the man for the position, which won't make Jones at all mad. Snider played

BELLS CAPTURE DOUBLE-HEADER

Missions Take Both Scraps by 8-1, 7-3 Scores

Angels Are Turned Back by Krause and Nelson

Visitors Make It Seven in Row From Seraphs

BY BOB RAY

The only difference a double-header makes in the showing of our Angels is that they simply lose two games instead of the customary one.

"Radiant Red" Krause made it seven straight over the Seraphs by cooping both ends of yesterday's twin bill, winning the opener, 8 to 1, and the nightcap by the more modest score of 7 to 3.

The very ancient and equally honorable Harry Krause turned back the Cherubs with seven scattered hits in the first clash, while "Swede" Nelson subdued the home talent in the nightcap. As far as we were concerned, there was nothing very interesting or exciting about either game. The Angels are absolutely helpless and if it were a fight instead of baseball they'd be tossed out of the ring and the referee would call it "no contest."

Ever Swanson, the speedy Swede, who plays centerfield for the Seals, suffered his forty-first and forty-second stolen bases during the twin bill to further increase his lead in this department of the game. Swanson has learned how to get the jump on the pitcher and that, combined with his speed, makes him a terror to the opposition when he gets on the base paths. Swanson has stolen an even dozen bases this week.

CLIFF WOODBURY CAPTURES 100-MILE RACE AT AKRON

AKRON (O.) Sept. 9. (AP)—Cliff Woodbury, of Chicago, driving a Buick front-drive car, won the 100-mile automobile race on the Akron-Cleveland board speedway today. Woodbury covered 200 laps around the half-mile track in 1:37:11, at an average speed of 68.8 miles an hour. The race had the sanction of the American Automobile Association.

One lap behind Woodbury was Babe Stapp of Los Angeles. Chester Gardner of Los Angeles, finished third, five laps behind Stapp.

The race was completed without mishaps of any consequence, but on the 118th lap Woodbury skidded at the first turn. He straightened his car out and finished without a stop.

STARS CAPTURE MORNING GAME

Six-Run Rally in Seventh Gives Seals Win

Score of Morning Triumph is 13 to 7

Seals Score Three in Eighth to Win Finale, 10 to 8

SAN FRANCISCO, Sept. 9.—San Francisco and Hollywood split even in a double-header here today, the visitors winning the morning game, 13 to 7, while the Seals took the afternoon contest, 10 to 8. Inasmuch as Sacramento also divided a double bill, the three leading teams in the Coast race maintained their same positions.

The Seals had a five-run lead in the seventh inning of the morning game, when Hollywood started a drive that gave them the contest.

The afternoon game was a close-up until Gordon Rhodes went in to pitch for Hollywood in the eighth. He fanned Caveney, but walked Sprime. Mathis, however, juggled the ball and then throwing it over Heath's head, Sprime sprinted from first in the mix-up and Mathis went to second. Johnson walked. Rhodes, waiting for Crockett, singled to score Mathis.

Murphy replaced Rhodes. Averill went out on a fly, but Johnson scored after the catch, making three runs for the Seals off one hit. Hollywood continued dangerous until the final out, but good luck helped the Seals to keep their lead. Score:

JOHNNY RILEY WINS TITLE

Los Angeles Athletic Club Diver Carries Away Diving Honors at Lake Norconian Event

BY OLIVE HATCH

Johnny Riley of the Los Angeles Athletic Club yesterday followed the footsteps of his famous brother, Mickey, by annexing the Pacific Coast indoor high tower diving championship in the Lake Norconian Club's titular meet at Norco.

Johnny won the crown from Stanley Kistler of the same club, with a 16-point margin and 68.33 points over his rival. Kistler's score was 78.51. Certain Carroll of the Olympic Club in San Francisco ranked third with 77.60. Riley was favored from the first, and his performance from the second and third dives was a joy to behold.

Miss Marion Dale, a fair-sex member of the Los Angeles A. C., wrested first place in the women's Southern California three-foot springboard diving championship, with 62.63 points. Verna Roland, a team-mate, placed second with 58.21. Third place in the championship was won by May Dun-

GRAHAM AND LA BARBA ON EDGE FOR OLYMPIC BATTLE

Bushy Graham and Fidel La Barba will watch the clock from now on until tomorrow night when they clash in a ten-round bout at the Olympic that should make boxing history.

Graham's New York title is safeguarded. The contracts in the weight class for 122 pounds. Each has posted \$2000 as a forfeit to tip over 118.

But for the last two days the boxers have been down below 120 pounds, proving they could easily make the title poundage if the contract permitted it.

Even smart boxing men are on the fence in making a pick. Graham rates as the best bantamweight in the East, but California has not had a voice in the matter until now.

La Barba is a smart fighter handled by one of the smartest men in the game. George Blake is without a rival in developing and without a fighter.

Blake does not become over-confident at any time, but he has often remarked that La-

BILL HUNTER STARTS TENTH SEASON AS TROJAN MENTOR

When football practice gets under way at the University of Southern California at 9 a.m. next Saturday one of the oldest men on the field in point of service to the Trojan institution in the coaching line will be Willis O. "Bill" Hunter, who will be starting his tenth year as chief assistant to the head coach at S.C.

Hunter, who holds the position of director of intercollegiate and intramural athletics at the University of Southern California, was Elmer "Gloomy Gus" Henderson's right-hand man during the six years

FRENCHMEN FAVORITES IN NATIONAL SINGLES PLAY

NEW YORK, Sept. 9. (AP)—It will be the field against the French, when the national singles tennis championship gets under way at Forest Hills tomorrow afternoon.

French domination of the courts has become so complete in recent years that no critic is hardy enough to predict anything, but the tri-color's third successive victory at Forest Hills.

Undoubtedly the French threat is lessened in some respects by the absence of Rene La Coste, champion in 1926 and 1927, but Henri Cochet and Jean Borotra still are entered again.

In the field of sixty-four, drawn from England, Australia, Cuba, Japan and Mexico as well as from France and the United States, Cochet stands out head

ATHLETICS SLAUGHTERED BY SLUGGING CHAMPIONS

Pitching of Pipgras and Hitting of Musel Spell Ruin for A's in Twin Bill, 5-0, 7-3

BY WILLIAM J. CHIPMAN
Associated Press Sports Writer

NEW YORK, Sept. 9. (AP)—Murders are at large in the land again, but nothing can be done about it. Just as Connie Mack's drive toward the end of the rainbow was beginning to take definite direction, the unfeeling Yankees brutally assaulted the grand old general and slaughtered his troops.

The massacre took place at the Yankee Stadium in full view of 85,000 horrified spectators, of whom \$1,622 paid to enter the premises of Jacob Ruppert. This bulging multitude, which had been over-running the lower Bronx since the break of day, was the greatest throng that ever witnessed a baseball game, world series or otherwise, and Edward G. Barrow, astute guardian of Yankee finances, would have smacked his lips with the same satisfaction even if the change of the world had not won by 5 to 6 and 7 to 3.

The chief casualties of the long afternoon were the ancient John Pincus Quinn, beaten into an unrecognizable bulk in the opening battle, and Edwin American Rommel, who, as the shadows enveloped players and spectators late in the second engagement, ventured once too often to the rescue of a comrade. The vaunted but lately missing hitting strength of the Yankees was turned loose with full force in the very face of Mr. Rommel in the eighth when Bob Musel smashed a home run into the left-field seats with the bases filled.

Musel's blow brought baseball's greatest crowd back to the side of the champions, and the Bronx heavens were rent by a roar such as never before had risen from a sporting gathering. The few thousand straw hats which had not already been pitched upon the field sailed from the stands, and tens of thousands of newspapers were

(Continued on Page 18, Column 3)

FAVORED NETTERS VICTORS

Seeded Players in State Tennis Tournament Score Easy Wins

SAN FRANCISCO, Sept. 9. (AP)—The California State tennis championship tournament continued today without an upset in the hundred matches that were run off. The seeded players advanced as was expected.

In the men's doubles, Keith Gledhill of San Jose and Barbara and Ellsworth Vines of Pasadena defeated Herbert Knapp and Albert Arnold of the California Club, 3-6, 6-4, 6-2. Both Gledhill and Vines advanced in the junior singles. Gledhill received a default in the second round and Vines defeated George Brady, 6-4, 6-0, in the same round. Wilbur Cox of San Jose in the same round defeated Melvin Whitman of San Mateo.

Gledhill and Vines advanced in the junior doubles by a default, and in the same event Tom and Nathan Bundy of Santa Monica went out of the tournament by a score of 6-2, 6-3, before the rackets of Carl

GRAHAM AND LA BARBA ON EDGE FOR OLYMPIC BATTLE

Bushy Graham and Fidel La Barba will watch the clock from now on until tomorrow night when they clash in a ten-round bout at the Olympic that should make boxing history.

Graham's New York title is safeguarded. The contracts in the weight class for 122 pounds. Each has posted \$2000 as a forfeit to tip over 118.

But for the last two days the boxers have been down below 120 pounds, proving they could easily make the title poundage if the contract permitted it.

Even smart boxing men are on the fence in making a pick. Graham rates as the best bantamweight in the East, but California has not had a voice in the matter until now.

La Barba is a smart fighter handled by one of the smartest men in the game. George Blake is without a rival in developing and without a fighter.

Blake does not become over-confident at any time, but he has often remarked that La-

DARO AFTER STRANGLER

More than a week of heavy training has been scheduled by both Malowicz, the crafty "Utica Panther," and Nick Lutze, the Chicago warrior, who clash in a best two out of three final finish bout at the Madison Square Garden, September 19, in the final round of Proctor-Less Doro's big elimination tournament.

Within the next few days Proctor Doro expects to complete arguments with Billy Sandow, manager of Lewin, and the latter's sense of his here October 3, against winner of Lutze-Malowicz match, champion of his manager's home from their two-month tour of Europe, expected to pick up for a few weeks before returning westward. The title-winner will have a few "warm-up" bouts on the way.

Lutze, who has wrestled Lewin here twice already, looked to be nearly at his best when he defeated Jim McMillen in a finish bout last week. With another week's training under his belt he is expected to be in the same physical condition as he was for his first meet battle with the title-holder.

Present plans call for Nick to continue his training work at Venice, with the eight guards stationed there as life-guards and two regular mat veterans acting as his trainers. Lutze has worked out with the life guards so often that several of them have become very good grapplers, according to Nick, and that he plans to help develop his speed.

CHUCKLES from LIFE

—And I'll Tell You Another
"Now," said the location man of the Outdoor Advertising Service to the advertising manager of the Dandelion Milk Like Wine Company. "I've found a place for a billboard that can be gotten for a song. You know the road that leads out of Milldale into the mountains? Well, I got an option on the first left turn after you leave that pumping station two miles from the crossroads. You know where I mean?"
"Yes," said the advertising manager; "but we're not interested in that location."
"Not interested? Then you're crazy! Why, do you know that 30,000 automobiles with an average tonnage of 8000 pounds and a mean carrying capacity of four persons pass that spot during the months of June, July and August alone? Do you know that every one of those people is a potential prospect for Dandelion Milk?"
"Yes, I know all that, but we're not interested!"
"Do you know I can get that spot, erect the sign and keep it in perfect repair for you for less than fifteen dollars a month, which is a milline rate of something like three-sixteenths of a cent per fiscal annum?"
"No, I didn't know that, but we're not interested."
"Do you know that the Orchid Condensed Milk Corporation will snap up that spot if you don't take it? Do you know what competition on that particular spot alone for a period of six months will cost your company?"
"Yes, I know perfectly. But I also know what the view is to the north from that spot. Let the Orchid crowd ruin it if they like. But the directors of my company would never consent to having one of our billboards spoil such a perfect vista. Good day!"
CARROLL CARROLL.

Santa Barbara Makes Record

SANTA BARBARA, Sept. 9.—The County Recorder's office today reached \$1885, the highest in the history of the county. The record was set by the sale of a piece of land in the Santa Barbara area.

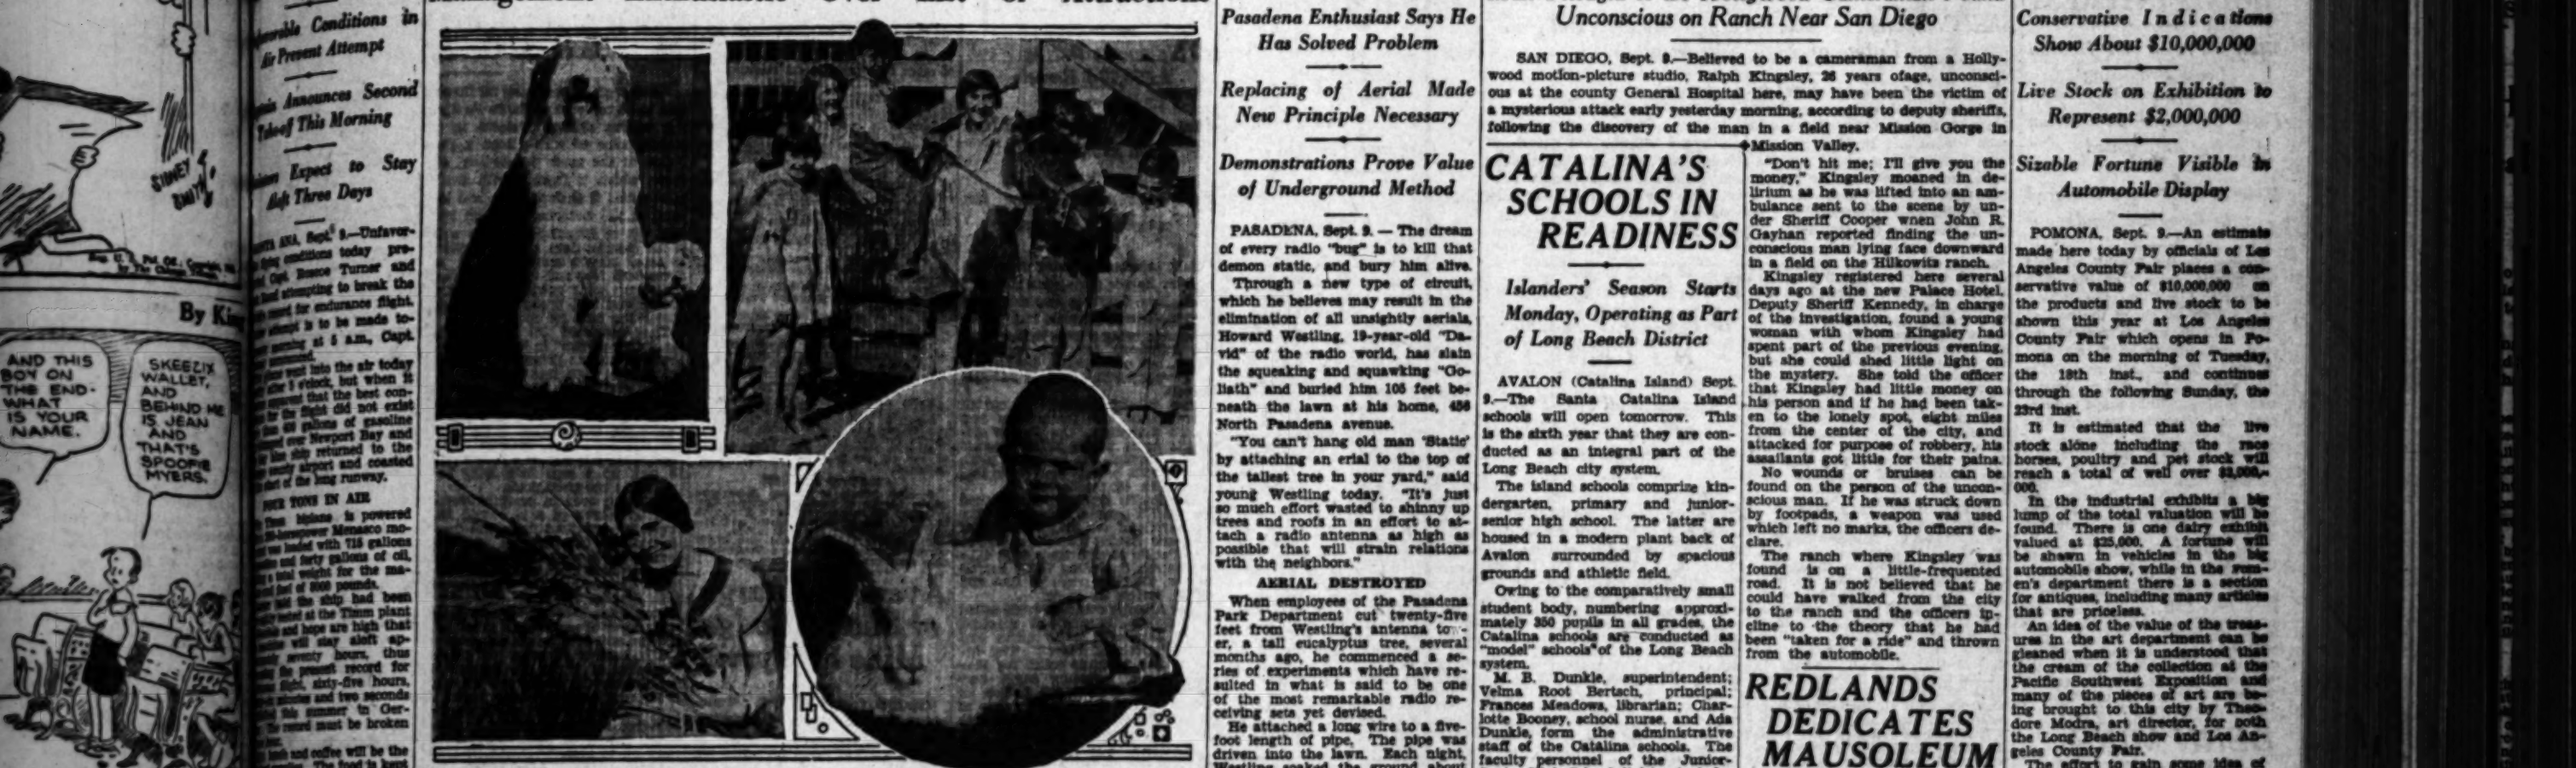

NEW TREASURES

PARADISE, Sept. 9.—Under a new policy of the Huntington Library, many new treasures and manuscripts are being added to the collection. The new treasures include a large number of rare books and manuscripts.

NEWS OF SOUTHERN COUNTIES

VENTURA FAIR OPENS NEXT WEDNESDAY

Management Enthusiastic Over List of Attractions

Pan and Deane (upper left) stars in the dog show and strong contenders for honors. Upper right shows group of Camarillo youngsters interested in one of the special features provided for children. In the lower left is dainty Phyllis Pett with her arms filled with gladioli such as will be displayed in profusion in the floral exhibit, and last, but not least, is a youthful owner and a splendid specimen of white Angora rabbit.

VENTURA, Sept. 9.—There is every indication that the 79,000 attendance mark set by the directors of the Ventura County Fair Association will be reached this year, according to an announcement today by W. W. Van Pelt, secretary of the association. The fair will be open from Wednesday next to Sunday, inclusive. Van Pelt bases his statement on the number of entries, the sale of advance tickets and the enlargement of practically every department of the fair. There are many new features to attract attendance almost double that of last year. A larger amount of money is being spent in entertainment at the grand stand, all excellent brass bands of twenty-five pieces by Indrean, four orchestras, one Spanish and one for dance music only, a number of clown, Spanish dancers, vaudeville acts, acrobats and comedy races are among the new entertainment features this year.

Wednesday will be Ventura and Rotary Day. This city has declared next Wednesday a public holiday and attendance is expected to be considerably increased on this day. Between 130 and 170 Rotarians from all clubs in Ventura county and Santa Barbara will be present for the annual fair barbecue at noon Wednesday. Following the barbecue, the Rotarians with their ladies will take in the fair. The race card and grand-stand entertainment on Wednesday is exceptionally attractive.

Wednesday night will see the first performance of James McCleave of Ventura, B. C. who will stage his noted horse show every night of the fair. He is bringing a large stable of horses with him and will give his program each performance. In addition to show there will be a stock horse class for men, with entries from Santa Barbara and Ventura counties only. Thursday will be Farm Bureau and Oxnard Day. Approximately 200 members of the Ventura County Farm Bureau are expected to gather for the annual barbecue at the fair. These together with hundreds of Oxnarders are expected to swell the attendance. Thursday afternoon features a stock horse class for ladies from Santa Barbara and Ventura counties only.

Friday will be School Day and Saturday will be the dog show. The dog show will be the largest ever presented in Ventura county as entries are far in excess of last year's number. The junior fair has caused great excitement among children and a large tent is housing this department. Nearly 100 members of live-stock judging clubs from high schools of neighboring counties will camp at the fair grounds Friday night and on Saturday the junior judging will continue.

In the afternoon on Friday the first whippet races will be presented. A large number of entries have been made through the Whippet Association of California, which is putting in some of the Southland's fastest dogs. Whippet racing will continue on Saturday and Sunday afternoons.

Saturday will be Los Angeles, Santa Barbara and Knights of Pythias Day. About 1000 Knights of Pythias have made reservations for the ceremonial and barbecue to be given by Al Yaman Temple, No. 202, D.O.R.C. of Santa Barbara. This is the biggest meet of Pythians this year. The main business sessions will be held in the high school auditorium while the pleasure part of the big meet will be at the fair grounds.

Sunday will feature open finals in all classes both afternoon and evening. Several large trophies will be awarded and the last day of the fair will close with a grand celebration during which the pleasure part of the fifteenth annual fair will be crowned.

The agricultural tent is filled with local and outside feature displays. The industrial section is crowded to capacity, including the automobile show. The rabbit and poultry tent will be taxed to capacity. Ranchers will be interested in the farm-implements show, while the women will find the women's department replete with interest. Lunch on tables, jama, jellies, art plants and flowers, afternoon talks, motion pictures and the educational department all share in importance and will play a prominent part in the Ventura County Fair.

SECOND MAN KILLED IN SAME PLACE
Another Workman Dies of Hurl Received on Gas Company's New Building
SAN DIEGO, Sept. 9.—With two persons crushed to death by trucks within two weeks at the building the gas company is constructing at Kettner and Ash streets, Coroner Kelly started an investigation of methods used in operating trucks at the building. The second victim was Don Case, 36 years of age, who was killed Friday when a truck operated by John Groffthold, backed over him while he was pushing a wheelbarrow. The other victim was Fred W. Rawley of Avalon, who was killed August 24.

Coroner Kelly will hold an inquest into the death of Case next Wednesday morning at 10 o'clock at the Norrell & Conwell funeral establishment in East San Diego. All witnesses of the accident will be summoned to testify. Indications are seen by Kelly that all possible precautions were not taken in backing of the huge trucks into the building. A representative of the District Attorney's office will be present at the inquest.

BROTHERHOODS TO MEET
HUNTINGTON PARK, Sept. 9.—United Church Brotherhoods of the twelfth district will meet Tuesday night at 6:30 o'clock, the session to be held in the St. Clement's Episcopal Church. Charles Eldred has been announced as the speaker for the evening. The district is composed of the brotherhoods in Bell, Maywood, South Gate, Lynwood, Compton and this city.

LA HABRA PLANS NEW BANK
LA HABRA, Sept. 9.—Backed by a group of local citizens, a movement is on foot to organize a new bank in this city. It was revealed, following a visit from a National Bank examiner who has been investigating the need for such an institution. The new bank would be 100 per cent home-owned and would be capitalized at \$50,000, the promoters declared.

WORK TO START ON TRAIL
Worst Section of Sunkist Route to Undergo Improvement Costing About \$100,000
BLYTHE, Sept. 9.—Work will begin on the 15th inst., on what is regarded as the worst spot in the Sunkist Trail, which lies between the Colorado River and Quartzsite, Ariz., according to telegraphic information received here today. Ken Hodgson of Globe, recently awarded the contract by the State of Arizona, is unloading machinery at Quartzsite, according to reports.

The nine and one-half miles to be improved will cost approximately \$100,000, according to estimates. The last Arizona Legislature appropriated \$150,000 to be spent on the Blythe-Quartzsite stretch. The highway will be made a standard grade, filling, rolling and surfacing. According to a wire from Secretary Grace Sparks of the Prescott Chamber of Commerce, Maricopa county and the district around Wickenburg are busy making that

YOUTH DISPELS STATIC CURSE

Pasadena Enthusiast Says He Has Solved Problem

Replacing of Aerial Made New Principle Necessary

Demonstrations Prove Value of Underground Method

PASADENA, Sept. 9.—The dream of every radio "bug" is to kill the demon static, and bury him alive. Through a new type of circuit, which he believes may result in the elimination of all unsightly aerials, Howard Westling, 19-year-old "David" of the radio world, has slain the squeaking and squawking "Oolith" and buried him 105 feet beneath the lawn at his home, 498 North Pasadena avenue.

"You can't hang old man 'Static' by attaching an aerial to the top of the tallest tree in your yard," said young Westling today. "It's just as much of an effort to shingle up trees and roofs in an effort to attach a radio antenna as high as possible that will strain relations with the neighbors."

AERIAL DESTROYED
When employees of the Pasadena Park Department cut twenty-five feet from Westling's antenna tower, a tall eucalyptus tree, several months ago, he commenced a series of experiments which have resulted in what is said to be one of the most remarkable radio receiving sets yet devised.

He attached a long wire to a five-foot length of pipe. The pipe was driven into the lawn. Each night, Westling soaked the ground about which with water. His simple method of driving the pipe into the ground consisted in lifting it out by the wire and dropping it into the soggy earth.

The pipe, stamped its way farther and farther into the ground, reception improved, until, after three months of this drilling, the antenna anchored reached the 105-foot level, and the set was freed from every vestige of static.

With a four-tube set, Westling started in on his experiment. The antenna, which was in the shape of a long pipe, was driven into the ground by the wire and dropping it into the soggy earth.

SECRETS INVOLVED
The "mystery" set is wired according to a circuit invented by the local radio genius. It utilizes several new principles, the secrets of which are guarded as jealously as the secrets of the Vatican. One of these unexplained effects is a bias hose which hovers over the tube filaments.

Like Col. Charles Lindbergh, he dislikes publicity and declined to have his picture taken when interviewed today.

Clare Resigns Presidency of Rabbit Growers
VENTURA, Sept. 9.—R. M. Clare, president of the Ventura County Rabbit Growers' Association, resigned as manager of the Oxnard packing plant at a four-and-a-half-hour association meeting held at the Courthouse. Objections on the part of members to the overhead expenses of the plant were responsible for the resignation.

Speakers at the meeting were R. F. Wisel of Roscoe; R. W. Farr, secretary of the San Fernando Valley Association; and L. E. Patrick and O. Lamar of Oxnard.

The Oxnard packing plant exclusively for sixty days in order to enable it to meet its contracts with the Los Angeles market, and placed a penalty of 5 cents per pound for meat sold elsewhere.

QUARTET OF CHARGES FACED BY CARTER
OLEDALE, Sept. 9.—Charges of possession of liquor, sale of liquor, possession of equipment for making liquor and contributing to the delinquency of a minor were all that faced Sylvan P. Carter, 736 Luton Drive, following his arrest shortly after midnight. The delinquency charge was filed when police charged that Carter had a 10-year-old boy acting as lookout for him.

LION HUNTER SOUGHT
SANTA BARBARA, Sept. 9.—A full-time lion hunter for Santa Barbara county and near-by counties is being sought by the Santa Barbara County Fish and Game Protective Association. The idea will be discussed in the September meeting of the county association Monday night, which will be held on the John J. Mitchell estate in Montecito.

RALPH KINGSLEY ATTACKED

Man Thought to Be Hollywood Cameraman Found Unconscious on Ranch Near San Diego

SAN DIEGO, Sept. 9.—Believed to be a cameraman from a Hollywood motion-picture studio, Ralph Kingsley, 38 years of age, unconscious at the county General Hospital here, may have been the victim of a mysterious attack early yesterday morning, according to deputy sheriffs, following the discovery of the man in a field near Mission Gorge in Mission Valley.

"Don't hit me; I'll give you the money," Kingsley moaned in delirium as he was lifted into an ambulance sent to the scene by Sheriff Cooper when John R. Gayman reported finding the unconscious man lying face downward in a field on the Hillkowitz ranch.

Kingsley registered here several days ago at the new Palace Hotel. Deputy Sheriff Kennedy, in charge of the investigation, found a young woman with whom Kingsley had spent part of the previous evening, but she could shed little light on the mystery. She told the officer that Kingsley had little money on his person and if he had been taken to the County Jail, she would have been notified.

The ranch where Kingsley was found is on a little-frequented road. It is not believed that he could have walked from the city to the ranch and the officers incline to the theory that he had been "taken for a ride" and thrown from the automobile.

CATALINA'S SCHOOLS IN READINESS
Islanders' Season Starts Monday, Operating as Part of Long Beach District
AVALON (Catalina Island) Sept. 9.—The Santa Catalina Island schools will open tomorrow. This is the sixth year that they are conducted as an integral part of the Long Beach city system.

The island schools comprise kindergarten, primary and junior-senior high school. The latter are housed in a modern plant back of Avalon surrounded by spacious grounds and athletic field.

Owing to the comparatively small student body, numbering approximately 350 pupils in all grades, the Catalina schools are conducted as "model" schools of the Long Beach system.

M. B. Dunkle, superintendent; Velma Root Borchert, principal; Frances Meadows, librarian; Charlotte Booney, school nurse; and Ada Dunkle, form the administrative staff of the Catalina schools. The faculty personnel of the Junior-Senior High School division includes Dow A. Barnes, industrial arts and mathematics; Harry Brentford, physical education; Marjorie Davidson, English; Gretchen McClure, commercial and social science; Beverly Robinson, music and history; Rebecca White, home economics, music and art.

Evening high-school classes will open October 8.

COMPTON JUNIOR COLLEGE TO START SECOND YEAR
COMPTON, Sept. 9.—With an enrollment of over 300 and more expected, the Compton Junior College will start its second year tomorrow. The college was established last fall. This year it has been greatly enlarged. A new science building has recently been completed and a complete second-year course will be offered for the first time.

The faculty has been increased to forty-four instructors, some of which are part-time teachers in the Union High School. It is headed by Dean R. C. Gillingham. Dean Gillingham received his degrees from Pomona College.

The Junior College and Union High School is one of the showplaces of Compton. The buildings are of Spanish architecture and the grounds are landscaped with shrubbery and palms. The school occupies an entire block.

SANTA BARBARA SCHOOLS SHOW TEN PER CENT INCREASE
SANTA BARBARA, Sept. 9.—Public schools of this city have shown an increase of approximately 10 per cent in attendance over last year. It was announced today by Paul E. Smith, superintendent of schools. There are now 5330 students in the kindergarten, elementary, junior and senior high schools, compared with 4800 at the time last year. The enrollment this week is 764 above that of last week.

United States Rabbitry Booth at Pomona Fair
FONTANA, Sept. 9.—The United States Rabbitry Experimental Station here will be represented by an exhibit at the Los Angeles County Fair at Pomona, the 18th to 23rd inst. This is to be the Federal institution's first appearance of that nature before the public.

Frank A. Mitchell, assistant chief of the bureau of biological services for the United States Department of Agriculture, completed arrangements for the Pomona exhibit before leaving for his office in Washington, D. C.

The rabbit experimental station will have a complete booth at the fair, in which the program of work being undertaken at the government station, the only one of its kind in the world, will be shown. There will be exhibits of rabbit meat and fur in the same department in the booths, and every rabbit and revealing the extent to which the meat and fur industries have developed in the United States in recent years will be distributed to the public.

The exhibit will be under direction of J. M. Meyers, who is acting director of the government station.

Carnival Shows Being Prepared
SOUTH GATE, Sept. 9.—The large tent for the South Gate Exchange Club's carnival, which begins here Tuesday night, has already been pitched at the corner of Firestone Boulevard and Dearborn. Displays are being prepared in the booths, and everything will be in readiness on the day of the opening. The carnival will be held all the remainder of the week, beginning Tuesday night at 7 o'clock.

ESTIMATE MADE OF FAIR VALUES

Conservative Indications Show About \$10,000,000

Live Stock on Exhibition to Represent \$2,000,000

Sizable Fortune Visible in Automobile Display

POMONA, Sept. 9.—An estimate made here today by officials of Los Angeles County Fair places a conservative value of \$10,000,000 on the products and live stock to be shown this year at Los Angeles County Fair which opens in Pomona on the morning of Tuesday, the 18th inst., and continues through the following Sunday, the 23rd inst.

It is estimated that the live stock alone including the race horses, poultry and pet stock will reach a total of well over \$2,000,000.

In the industrial exhibits a big lump of the total valuation will be found. There is one dairy exhibit valued at \$25,000. A furniture will be shown in vehicles in the big automobile show, while in the summer department there is a section for antique and modern furniture that are priceless.

An idea of the value of the treasures in the art department can be gleaned when it is understood that the cream of the collection at the Pacific Southwest Exposition and many of the pieces of art are being brought to this city by Theodore Modra, art director, for both the Long Beach show and Los Angeles County Fair.

The effort to gain some idea of the total value of the products shown came as a result of a realization that entries were pouring in earlier and in much greater quantities than ever before. Thus it was that a more authentic check was possible this year than ever before.

President C. P. Curran of the board of directors, Secretary-Manager C. B. Afterbaugh and R. C. Sherburne, member of the board of directors, returned yesterday from a visit to the Sacramento fair and reported that the cream of the exhibits and live stock from the big State Fair would come to Pomona. Incidentally, they personally delivered an invitation to Gov. C. G. Young to be present at the opening of the Southland show this year.

Santa Barbara To Entertain Old Pioneers
SANTA BARBARA, Sept. 9.—Pioneers of Santa Barbara county will be honored Monday afternoon when they will be guests of the Native Sons and Native Daughters of the Golden West at a huge reception.

More than a score of residents who came here in the '30s and '40s will be honored. Among them will be Mrs. Charles Fernald, 91 years of age, who came here in 1893; Mrs. Jane Kimberly, 90, a local resident since 1896; Cesar La Tallada, who was born here in 1893; Judge E. D. Smith, 73, who for fifty years was undersheriff of the county; C. A. Stokes, 61, for several years a member of the State Board of Education; Maj. E. N. Dunne, 57; Judge William H. Wheaton, 84, who is still justice of the peace, and many others.

Fruit Exchange Being Enlarged
SAN FERNANDO, Sept. 9.—The capacity of the plant of the San Fernando Fruit Growers' Exchange is to be increased approximately 50 per cent, according to a statement by F. A. Pomeroy, manager. Concrete is being poured in the basement of the building and the plant will be capable of handling half again as many boxes of fruit in an efficient manner. The enlarged facilities will be ready for next year's pack, according to Pomeroy.

AIR MAIL INCREASES
REDLANDS, Sept. 9.—Local merchants are getting "red" on the use of air mail that an increase of 50 per cent is reported by James P. Wheat, postmaster, who has just received a shipment of 5000 air-mail stamps.

ELOPEMENT STRIKES SNAG
Mother of Youthful Jewell Davis and Officer Terminate Honeymoon With Ralph Sterling
WHITTIER, Sept. 9.—A honeymoon that flashed in the pan, flickered for a few brief days and finally ended, owing to the strong arm of the law intervening, was that of Jewell Davis, 17 years of age, and Ralph Sterling, 23, both of this city, who were married in Yuma, Ariz., August 31, by a local justice of the peace.

The girl is the only daughter of a bureau by swearing that the girl was 18 years of age. She was a student at the local high school until a short time ago, having dropped out of school on account of throat trouble, for which she was taking treatment from a Fullerton physician.

Sterling came to Whittier some months ago from Lancaster, O., and had been variously employed about town, recently having been employed at the Whittier State School for Boys. He is in the Los Angeles County Jail under the \$1000 cash bond, which he has failed to raise. His trial is to come up here on Saturday, the 15th inst., before Judge Frank C. Swan.

Last-Minute News From Petroleum Fields and Marts of Trade

DIAMOND DRILL FINDS RICH ORE

Core from Squaw Creek Mine on Exhibition

Copper Sulphide Values Set at 22 Per Cent

Lundquist Joins Double O Metals Staff

PRESCOTT (Ariz.) Sept. 9. (Exclusive)—According to an official report a diamond-drill core of 22 per cent copper sulphide is in evidence from new work now being done on the Squaw Peak property, near Camp Verde. Several holes have been drilled, with ascertained development of much good copper-bearing ground.

E. H. Lundquist, formerly with the Magna Copper Company at Superior, is at the head of the Double O Metals Company, which has a 500-acre lease on the Arizona National property, near Humboldt. The property has had extensive developments and has a sixty-ton floating plant, now in operation on lead-silver ore. Thirty thousand tons, blocked out, are said to sample from 110 to 160 a ton.

In the Seneca section, south of Prescott, operation of the Storm Cloud mill has been so successful that the plant is to be enlarged to a capacity of 100 tons a day. Diamond drilling has established the presence of a fifteen-foot body of high-grade copper, gold and silver ore below the present workings.

Richard Kingston, one of the most prominent of Arizona mining men, is in charge of development of the Gold Crown Silver Mining Company, operating the old Breaux mine in the Bradshaw Mountains. The property has a production record of about \$1,000,000. On a new low level has been struck remarkably rich lead-silver ore, about twenty feet in width. Samples run to 1600 ounces silver. A heavy flow of water is impeding operations.

Oil Activities in Kern Fields Given for Week

BAKERSFIELD, Sept. 9. (Exclusive)—In the oil fields of Kern county last week three new wells were spudded in, five tests for water shut-off were made and two re-drilling jobs were reported.

The new wells were Pacific Eastern Production Company No. 1, Sec. 4, 30-28, on Union avenue; R. S. Lytle No. 2, Sec. 26, 27-28, and General Petroleum Corporation No. 16, Sec. 16, 27-28, both in the Mt. Poso area.

Tests for water shut-off were: Milham Exploration Company Page No. 1, Sec. 6, 28-23, Bunionwillow; Union Oil Company No. 1, Sec. 30, 28-21, and the Berry Oil Company No. 84 on the same section, both in the Bridge district; Kern River Oilfields of California, Ltd. No. 2, Sec. 13, 28-23, Round Mountain; Lytle No. 1, Sec. 26, 27-28, Mt. Poso Creek field.

Thrilling Crash of Speeding Plane Horrifies Throng

When Death Seemed Near for Aviator
Above—Lieut. Hasselman's Boeing fighter doing a cartwheel at Mines Field. This remarkable action photograph was snapped by Fred Coffey of The Times staff an instant after Lieut. Hasselman's left wing hit the ground at 160 miles an hour and the plane still was hurtling across the field. The plane is shown with its right wing emerging from the cloud of dust and the landing gear still intact. The dark spot below and to the right of the plane is the 400-horsepower Pratt & Whitney Wasp engine which was jarred loose from the body of the plane by the impact and is rolling across the field. By the time the plane came to a complete stop both the wings and the landing gear which are intact in this picture, had been torn loose and were strewn all over the vicinity. Below—A portion of the huge throng which attended the air meet yesterday.

TEN INJURED,
ONE ARRESTED
IN CRASHES

Publicity Man Arrested
After Smash-up
Ten persons were injured, five seriously, and a man was arrested on suspicion of driving while intoxicated in connection with traffic accidents yesterday and last night, according to police reports.
Pitt Hand, publicity man of Herman Beach, was arrested for drinking while driving following a crash between his car and one occupied by Mr. and Mrs. Orval Johnson, 4077 West Thirty-third street. Mr. and Mrs. Johnson were injured. They were treated at Georgia-street Receiving Hospital, as were the other traffic victims.
Mrs. Minnie Bell, 43 years of age, 305 North Compton avenue, was seriously injured in a collision between two cars at One Hundred and Third street and Compton avenue.
Mrs. Jennie Garcia, 50, of Paralta, Cal., suffered possible internal injuries when she was pinned under an automobile driven by her husband at Hines and Indiana avenues.
Laurel Bloom, 34, of Hood, Cal., is suffering from shock, internal injury.

BALLOT MEASURES BARRED

Council Legislative Committee Rejects Three Plans,
Holding Initiative Necessary
Three times the City Council's Legislative Committee has said "No" on requests to place city measures on the November 6 general election ballot which would radically change the present Los Angeles municipal governmental system.
"No," said the committee to the request of the Community Taxpayers and Improvement Association, through John F. Miller, to place on the ballot a charter amendment abolishing the Police Commission and the City Council, and by a majority of the City Council to elect a police commissioner.
The committee said it took no position either for or against the propositions but believes that they should be placed on the ballot either by initiative petition or by a heavily signed petition of voters from all parts of the city to the Council so that the Council would be in the position of granting a public demand.
The committee's report, which

PIER SUIT ASKS \$313,969

Accuse Cykler of Using Cheap Compound in Treating
Piling of San Diego Amusement Structure
If the piling supporting the pier and dance pavilion of the Crystal Pier Amusement Company at San Diego were treated with creosol instead of crocoas as a protection against sea water, has the company been damaged to the extent of \$313,969.31?
This is one of the issues in an odd lawsuit being tried before Superior Judge Ambrose. Taking of testimony will be resumed tomorrow. It is expected the trial will last two weeks.
The action was brought by the Crystal Pier Amusement Company of San Diego against Emil F. Cykler, Frank Shalin and Paul Hinderberger, doing business as the California Crocoating and Timber Company. It is a complaint for damages and breach of contract.
The amusement company asserts that in March, 1926, preparations were made for the building of a pier at San Diego beach to be 530 feet long and 240 feet wide at its widest part.
The defendant company, it is asserted, represented itself as an expert in the treatment of piling for piers to protect them against the action of sea water, declaring that it used a twelve-pound crocoas treatment which was a perfect resistant against decay.
A contract was entered into on March 17, 1926, wherein the cost of

BREAKDOWN
SUSTAINED
BY CUDAHY

Member of Packing Family
Taken to Hospital for Rest
After Collapse
Michael J. Cudahy, of the famous Cudahy meat-packing family, is in the Hollywood Hospital recovering from a nervous breakdown which he suffered Friday, it was learned last night.
Quiet and rest for the next few days will bring a complete relief to Cudahy, it is announced, and he will be able to leave the hospital little the worse for the sudden blow to his nervous system.
CARD PARTY TOMORROW
The monthly stag bridge party of the Masonic Club will be held in the clubrooms tomorrow evening.
DYERITES WIN BATTLE OF SONG
Factions Have Rival Services, But Pastor's Flock Gets
Organ and Forces Foe to Quit Sermon and Join in
Harmony That Rises Amid Church Discord
Dr. Frank Dyer, pastor of the disension-ridden Withers Boulevard Congregational Church, yesterday scored a musical victory over the faction seeking, through various court actions, to oust him from the church. He succeeded, and did so yesterday, the opposing group led by Rev. Thomas H. Harper withdrew to Gonsalus Hall, which adjoins the main church. With the doors closed the voices did not penetrate from one room to the other.
The preliminary announcements concluded, Rev. Mr. Harper raised his voice in prayer. Suddenly the deep-throated peal of the church organ filled the room, as the Dyer organist began the opening chords of a well-known hymn selected for his congregation by Dr. Dyer.
Finding his prayer drowned out

Rodeo Friends
Join to Fight
Initiative Bill

Cattlemen, ranchers and farmers throughout the State are being joined by many of the leading business and professional men and women of the cities to defend the rodeo, according to J. A. McNaughton, general chairman of the Rodeo Educational Association, recently formed here to protest the passage of Initiative measure No. 21 at the November election.
"There are no greater friends to animals than the men of the great western range," says McNaughton. "They are the first to frown upon any practice in the handling of horses, cattle or other live stock, which could be accurately interpreted as cruel or inhuman. They contend, however, that if this measure, designed to prohibit rodeos, should become a law, it would seriously hamper the conduct and progress of their business, and rob California of one of its most colorful and romantic institutions."
Mr. McNaughton pointed out that this measure, if made a law, would increase administration expenses of the State, thus adding to the taxes of the people who already have provided adequately for the protection of all animals, under the laws now in force.
A romance that had its beginning one year and five months ago went on the rocks in the courts. Superior Judge Bush when Robert H. Johns was granted a decree of divorce on his cross-complaint to an action begun by Mrs. Irene Johns. Both charged cruelty. A small child was placed in the custody of the wife's mother.

STATE FATHERS EULOGIZED

Native Sons at Point Fermin Barbecue Hear Flag of
California Praised by Meserve
Californians have a heritage of tolerance and progress, born with the raising of the first Golden Bear flag over Sonoma in 1844, which has been the chief factor in raising the State to world leadership, Edwin A. Meserve told 3000 Native Sons and Daughters of the Golden West gathered yesterday at Point Fermin Park from twenty-one Southern California chapters of the order in a barbecue eighth Admission Day.
"The Golden Bear flag of the California Republic, symbol of the Native Sons and Daughters of the Golden West, is not treasured merely as an historic heirloom of the order, but as a symbol of the spirit of the pioneer, the spirit of the man who in less than a century has taken the Golden State out of the chaos of the frontier to leadership in world commerce and artistic achievement," declared Mr. Meserve.
EARLY STRUGGLE
"People have criticized the design of the California flag, but let me prove to you that its design symbolizes the early struggle for liberty and recognition. When the miners at Sonoma had surrounded the Vallejo garrison, Joe Todd painted a bear on a square of canvas and another miner sewed a strip of red flannel shirt across the bottom. That flag flew over Sonoma for a month, when word came through that in July Commodore Sloat had landed at Monterey and had hoisted the Stars

NAVY SKY RACERS FURNISH
THRILLS AT MINES FIELD

Crowd of 75,000 Sees Daredevils;
Navy Flyer Crashes in Contest;
Heroes of Past Honored

Pathos and tragedy, intermingled with joys and thrills, yesterday served to make the second day of the National Air Races and Aeronautical Exposition one of the most eventful in Los Angeles aviation history. Heralded as memorial day for the army round-the-world flight, the day started off with honors for the men who took part in that pioneering flight, and reached its climax with a sensational crash of a racing plane directly in front of the crowded grand stand.
Thrills galore were supplied the more than 75,000 persons gathered within the inclosure of Mines Field, and tens of thousands more lining the adjacent countryside, by the maneuvers of the government service planes, but it remained for Lieut. O. H. Hasselman, member of the VZB navy squadron from San Diego, with his wife awaiting his return to the ground, to supply the supreme thrill.
The flyer did not delay in exhibiting his daring. From the time he left the ground in a race between him and fourteen squadron mates, spectators were on their feet watching his hazardous turns around the home pylon, and the fourth time he banked for the turn, with his wings in a vertical position, brought shrieks from the women and groans from the men. Lieut. Hasselman's plane side-slipped to earth, barely missing a Times photographer, and his ship was a mass of wreckage.
All activities at once were suspended, the race was called off, and every facility of the race association was made available to rush the injured flyer to medical and surgical treatment.
Hasselman will recover, according to surgeons at the Culver City Community Hospital. He received deep lacerations on his head and face, but there is no evidence of a skull fracture. He was conscious and rational at the hospital, but did not discuss the crash.
Despite this black mark on an otherwise perfect day, the fact that the events were in commemoration of the Army's history-making flight was not forgotten.
In September, 1924, three Army planes landed here after completing their memorable flight of more than 40,000 miles and yesterday four of the pilots who took part in this pioneering expedition returned to see pilots from the Marine Corps speed around a five-mile course six times in the memorial race held in honor of their history-making feat.
From a standing start, shortly after 2 p.m. the six Curtis Falcon planes took off and for twenty-five minutes thrilled the spectators in the crowded grandstand, as well as thousands who remained in the surrounding countryside, with their hair-trigger banks around the pylons at low altitudes, and at speeds of approximately 125 miles an hour.
The race was won by Lieut. Beckers in twenty-three minutes twenty-one seconds at exact speed of 125 miles an hour, closely followed by Lieut. Cushman, Sergt. Pounders, Sergt. Ewalt, Sergt. Hull and Lieut. Woodard, in the order named.
Marred by the crash of Lieut. Hasselman's plane as it turned around the home pylon, the second race of the day was called off and the other fourteen planes of the VZB navy squadron, which were participating in the race returned to the ground. The race was providing many thrills with the daring turns at high speed and low altitudes and spectators remained around the grandstand for an hour after the accidents to hear reports on the pilot's condition.
All highways leading to the field were jammed with automobiles at an early hour in the morning and the congestion continued until late in the day. The grand stands, seating more than 12,000 were sold out an hour before the program started at 2 p.m. and thousands more crowded around the field to get glimpses of the flyers and planes.
Yesterday being officially designated as American Legion Day as well as Memorial Day for the epoch-making flight of army pilots, Lie-

AIR FIELD'S
MECHANICS
DIE IN CRASH

Two Meet Fate and Youth
Injured Near Del Rey As
Plane Falls 1500 Feet

While thousands at Mines Field watched death-defying stunts by hundreds of flyers gathered for the Air Race and Aeronautical Exposition, a plane, unwatched save by a few chance motorists, waved 1800 feet in the air, went into a tail spin and crashed to earth in the Del Rey Hills south of Manchester avenue at 7 o'clock last night.
Alden Baker, 30 years of age, and Henry Krause, 35, mechanics at the Rogers Airport, lost their lives, and Sheldon Riley, 17, was in a serious condition in the General Hospital last night as a result of the crash.
According to officials at the airport, the trio took off to test a plane owned by C. C. Bishop. They had been working on the carburetor and took the ship aloft to test the motor in flight, with Baker at the controls.
Baker was not a pilot at the Rogers Field but was able to fly and had the privilege of taking planes aloft to tune the motors.
The Riley boy was in the habit of visiting the field but had no official connection with the organization, Gene E. Webster, president of the Rogers Airport Company, stated.
Whether the trio had been to Mines Field, could not be learned from Webster. He said that a passing motorist reported Baker had been looping the plane, while another reported to him that the ship was being piloted by a stranger, a course when it went into a tail spin.
The body of Baker was taken from the wreckage by A. Strickland and N. Christensen, who reported they saw the plane spin and crash. Krause died a short time later at the Santa Monica Hospital without regaining consciousness.
Addresses of the three men were not available at the airport last night. Webster said that he believes Krause to be married, but that Baker is single.
From documents found in his pockets, it is believed Baker resided at 4153 South Hoover street.

City to Ban
Use of Name

The City Council is scheduled to adopt an ordinance tomorrow prohibiting the use of the name of any department of the city or of an officer of any department in connection with the solicitation of funds for any private enterprise or the sale of advertising.
The Board of Public Works has gone on record several times in opposition to the use of the name of the department or of any of its officers under its supervision in connection with the solicitation of funds for any private enterprise or the sale of advertising or for the sale of tickets to social events.
Important plans regarding activities of the United Church Brotherhood of Los Angeles will be discussed at a meeting of the executive committee of that organization to be conducted at noon Friday at the Y.M.C.A. Building.

ROMANCE ON ROCKS

A romance that had its beginning one year and five months ago went on the rocks in the courts. Superior Judge Bush when Robert H. Johns was granted a decree of divorce on his cross-complaint to an action begun by Mrs. Irene Johns. Both charged cruelty. A small child was placed in the custody of the wife's mother.

The Lancer

Harry Carr

SHE grows older Peggy Hopkins Joyce believes in picking them before they are quite ripe.
She announces in a burning message that she has been proposed to by Lord somebody or other; and the engagement becomes valid just as soon as he gets divorced. Passage booked, as it were, to be taken up before train time.
As a lady of vast experience, she never allows herself to be caught in a predicament. She always gets the current husband completely off her hands in ample time to be able to act quickly in eventualities.
Peggy's matrimonial invasion of Europe seems to indicate that the local market is exhausted. She started conservatively with one of the lesser Swedish counts. But now she's started, the queens and empresses had better watch their property.

MORE ALIBIS

Mr. Dink Templeton of Stanford is under no necessity of making explanations, inasmuch as his boys won; he rises to explain, nevertheless. He adds another alibi to the prodigious supply of alibis for the defeat of the American track men at Amsterdam.
The more profusely the coaches explain, the more does it become plain that it is at their doors the humiliation of America can be placed. Why come back and tell us that our athletes lost because they were trained on the wrong kind of track; that they shouldn't have lived on a cramped-up host? The coaches had every opportunity to know what the track in Holland would be like. Why didn't they train for that kind of track?
No person who advertises himself as a technical expert in any line has a right to present excuses. . . . alibis . . . reasons . . . explanations. When he says he knows, and takes money for it, he has cut all bridges behind him.

SIXTEEN YEARS AFTER

The return of the native. Not an ordinary native. She is a literary woman, born in Los Angeles. She hasn't seen the city for sixteen years. This is how it hits her:
"That it is no longer Californian in character; that there are fewer trees; that the characteristic vegetation has changed from the humble geranium and calla lily to all sorts of plant gorgeousness.
One great impression that obliterates everything else, however: that Los Angeles has learned to have such a good time. The place seems to her fragrant with pleasure and devices for pleasure."

BACKLESS BATHING

After a hot day at the beach I am prepared to give one more deathless truth to the eager world:
A young lady with turkey trackles along her spinal column should have no truck with these new backless bathing suits."

ITCHING FEET

I don't know that anybody except myself is much excited about this, but if anybody knows of a fairy godmother with some extra time on her hands I have a yen.
My soul yearns to go to the following places: I want to go to Saigon on the Indo-China peninsula.

AUNT HET

"They say young folks is goin' to act like they was married anyway, an' ought to have a companionate marriage to legalize it. I reckon, then, if a feller is goin' to be a thief, the right thing is to give him a license to steal."

WET CANDIDATE PLEDGES RIDICULED BY DR. BROWN

Christian Church Pastor Charges Plot to Bring Constitution Into Disrepute

Whether a straw vote means much or nothing depends on whether your candidate wins or loses.

The lady who yawns to be kissed as it is done on the screen shouldn't blame her screen might do it if she resembled the lady on the screen.

A police captain says the best cars have the fewest wheels, which merely upholds the theory that a radical is wild because he hasn't much to lose.

There are two reasons why people live on and in the same neighborhood: the home instinct, and the doctors don't let all they know.

When society becomes too humane to kill in cold blood, perhaps its members will be decent to kill even in the heat of anger.

Maybe all accidents are accidental, but very few of the car accidents that survive to be tried in court are injured.

You seldom see the great manner any more, but the man who taps the first class shower with a coin before he is in a hurry to buy a stamp.

Correct this sentence: "I wanted my horse to be like the tourist, and he didn't want to."

Most of us like home-made things, in spite of which we don't always profit by our own mistakes.

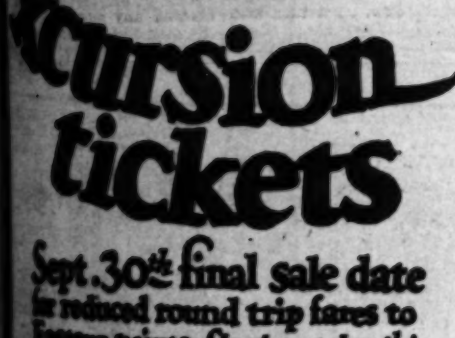

All things are possible. For instance, many a man is known on his own resources who hasn't any.

Well-Mannered

Blotted Landscapes

"You have a lovely country here," remarked the tourist, overjoyed. "But it would be destroyed if all the signboards were removed. You wouldn't have the stupendous lines, the beautiful crags are good to see, but you can't see them for the signs announcing Johnson's Kidney Pills. A tourist has to stop his car, get out, walk a half a mile or two, and look around behind the signs. He has an ocean that is grand, the sight of it gives pleasure to the eye, but right before it is a sign for Liver Pills. I have to crawl underneath a sign, or climb over one, or tear it down, to see the ocean and the shore. I think your finest day is much more than the day to see the set, a signboard's always in the way. One cannot see the gorgeous tints that sunset paints at evening, unless he gives up the idea of seeing the ocean. You have some valleys and your towns which might invite the tourist's gaze, but signs, announcing the set, block the way. The scenery on earth is which is secured by signs which tell of pills that will reduce your appetite and heal your nerves, stomach, and heart. You are all so busy with your pills, you will all be blinded by the signs, bitterly ashamed of the things you thus deface the feeling of the landscape. The men who sell the pills with signboards, furbelows and vacant lots and plebeian pills."

SCIENTISTS COMPLETE FIRST STAGE IN NEW STUDY OF MOON

A committee headed by Dr. F. E. Wright of the geophysical laboratory of the Carnegie Institution of Washington, composed of astronomers, geologists and mathematicians, has just completed at the Mt. Wilson Observatory the initial stage of the first intensive study of the moon in the history of astronomy. It was pointed out by Dr. Wright yesterday, just prior to his departure for Washington, that while the moon has been studied from time to time by astronomers and occasionally by geologists, it never has been subjected to a searching investigation by representatives of the various scientific groups working together. He said that as a result of the investigation started here a few weeks ago, and which will be resumed again within a year, it is hoped to determine the origin of the craters on the moon.

He explained that there are two theories of the origin of the craters. One is that they were caused by a bombardment of meteors early in the life of the moon, and the other is that the craters are of volcanic origin.

Most of the observations made by the committee were made with the 100-inch Hooker telescope, the largest in the world, and many photographs were taken. Later it is planned to make a complete photographic map of the moon from large sized photos.

Members of the lunar committee include Dr. Walter S. Adams, director of the Mt. Wilson Observatory; Francis G. Pease, Edison Pettit, John P. Burwinkle, Paul Epstein, Dr. A. L. Day and Dr. H. W. Russell.

SAYS HOOVER WILL GET SUPPORT OF FARMERS

"Will Hoover get the farm vote?" is one of the questions discussed by Rev. J. Whitcomb Brougher, Jr., in his sermon yesterday at Olendale Baptist Church. Mr. Brougher said in part:

"If the farmers of the United States know Mr. Hoover as most of us do in California, they know that he will proceed at once to secure the wisest counsel among the leaders of the farmers and, with the backing of a Republican Congress, give to them the best solution possible to their problems. Mr. Hoover has never undertaken a task in his public career that he has not done well and efficiently. He began life on a farm, his ancestors were farmers and his relatives today are farmers. He has the farmer's point of view and is in perfect sympathy with their needs. A man who is acquainted with farming is better fitted to solve the problem than one who was raised on the 'sidewalks of New York' and whose chief knowledge of farming has been learned where the only farming done has been raising wild cats. I believe that Mr. Hoover will get the overwhelming majority of the farm vote of the country."

CHRISTIAN SCIENTISTS DISCUSS "SUBSTANCE"

"Substance" was the subject of the lesson-sermon yesterday in all Churches of Christ, Federated Churches of the Mother Church, the First Church of Christ, Scientist, in Boston, Mass.

The citations which comprised the lesson-sermon included the following Bible verses from Proverbs, 8:

CALLS CHRIST TYPE OF BEAUTIFUL DEEDS

Pointing to Jesus as "the perfect type of beautiful deeds," Dr. John Snaps preached at Temple Baptist Church yesterday on "The Glory of Goodness." He said in part:

"Who invented the sewer pipe? Nobody can tell, but what a blessing it has been to humanity! Who invented the needle? Nobody knows, but that it has been a benediction to woman, and a necessity for man, everybody knows. Who wrote the book of Ruth—David or Solomon? Who wrote that marvelous drama called the book of Job? Nobody knows. What difference does it make anyhow whether anybody ever knows about our best and mightiest efforts? Is it not enough that humanity is benefited by them? Works that are secretly beautiful, works that increase the love of the beautiful in the breast of man, works that are anonymously beautiful, if they smoothen the pathway for the weary feet of humanity, carry their own compensation with them, and need not be identified with the name of the individual who initiates them."

SHOWS CHURCH'S PLACE IN PLANS FOR PEACE

Dr. H. F. Magnin, rabbi of Temple B'nai Brith, preached last Sabbath on "Universal Peace." He said in part:

"For centuries religious teachers and seers have dreamt of universal peace. While the church and the synagogue have furnished no definite and concrete method of bringing it about, they have rendered a great service to humanity and do today, by preparing the hearts and minds of men and women for the acceptance of this great idea. After all, there can be no peace in the world until people believe in it. Legislation never succeeded in making radical changes in human affairs without an accompanying conviction in the minds of men. Justice, love and the sanctity of human life. The Bible begins with the lessons of peace and ends with it. One of the great obligations and duties devolving upon religious institutions today is to sow the seeds of friendliness and good will in the heart of the peoples of the world."

LOOKS TO CALIFORNIA TO LEAD ORIENTALS

Rev. W. C. Zeit, pastor of the Union Church, preached yesterday on "The Course of Empire." He spoke in part as follows:

"Why does mankind have that restless spirit which ever urges him on from the place of established habitation to newer lands not yet known? And why has he always been urged westward? Only by reason of divine purpose and guidance can we answer the question why the course of empire is ever westward. Now we face the western sea. The Golden Gates swing outward. The Orient looks to us to lead in the search for the riches we have found and are in duty bound to share. I am looking to California to lead in this pioneer work as she has ever led. The hand of God points westward, the urge is still upon our people. The land lies just across the sea. The Orient is astride. It is for the Christian pioneer to advance in the same spirit which inspired the men like those who came to California when she became a State."

THINKS PRAYER NEVER CHANGES NATURAL LAW

Dr. H. C. Culbertson of Plymouth Congregational Church preached yesterday on "Conditions of Triumphant Prayer." He said in part:

"Prayer is not asking God to set aside the laws of His character and make false the principles of life. You cannot point a pistol at a man, pull the trigger, and then expect that a prayer to God will stop the bullet, nor can nations make war and then expect prayer will stop the consequences and avert the bullets and the horrors which our own sinful wills have produced. We cannot do wrong and expect some magic power to right the wrongs instantly, for this is not a magic universe but a universe permeated with the character of God. As children ask an earthly parent for things he is able to do in accordance with his character, confiding in his love, so the Christian asks God to help him, and rests down upon the assurance that the same transcendent love that is caring for the lilies of the field and the birds of the air will keep in perfect peace those whose hearts are stayed on Him."

JAPANESE GOING IN FOR RECREATION

Tokio Educational Agent on Visit Here to Study This City's Plan

Recreation centers in Tokio, Japan, similar to those in Los Angeles, are to be recommended for that city by K. Mywata, supervisor of physical education in Tokio schools. This was his statement yesterday after he had looked over the pools and playgrounds here.

Accompanied by H. Shoji, said to be the Japanese champion of Japan, Mywata called at the Playground and Recreation Department in the City Hall to get all the information he could on the results of playgrounds and pools in Los Angeles.

At present, he said, physical education has taken a strong hold of the people in Japan, and Tokio normal and public schools pay considerable attention to the study, with a view to upbuilding the race. He is in the United States to study American methods and express much interest in recreation centers, by which the populace gets its recreation in play where the individual does not care to enter his attention on physical development.

Separation of Grades Will be Begun at Once

Work is to start soon on the separation of grades at Venice and La Cienega boulevards as the result of a conference held last week by officials of the city and the Pacific Electric Company, when difficulties which have delayed the project were ironed out. The Pacific Electric has agreed to pay 25 per cent of the cost of paving a short strip under a viaduct that would provide for the necessary separation of grades.

La Cienega Boulevard runs into Venice Boulevard on both sides of the Pacific Electric right of way. The latter is owned by the railway and five years ago proceedings were instituted to carry La Cienega across the tracks on a viaduct which it is estimated would cost \$250,000.

The railway was ordered by the State Railroad Commission to pay 25 per cent. The county agreed to pay \$20,000 and later increased its offer to \$100,000. The city will have to pay the rest, although an effort is being made to get a really competent to pay \$25,000 which is said to have been promised.

TRAFFIC SIGNALS ASKED

The installation of automatic traffic signals at the intersection of McClellan avenue and Jefferson street has been requested of the City Council by the Greater Jefferson and Exposition Boulevard Improvement Association.

Best in Dry Goods Since 1878—Store Open All Day Saturday

Telephone TRinity 1421

Coulter Dry Goods Store

FOUNDED IN 1878

Seventh Street at Olive

The Gift Shop Features an Artistic Lamp for Monday Buyers; Complete for \$15

We have sketched one for your better acquaintance with its graceful, artistic lines—a lamp that is ideal used singly, or in pairs on a console table. Complete with pottery urn base and tailored shade, it stands 26 inches high, and may be had in jade, ivory or canary tones. Put "Lamps from Coulter's Gift Shop" on your list for Monday!

(Fourth Floor—Coulter's)

The New Trimming Furs Are Here Now

So flattering and fluffy that women simply cannot resist picturing some favorite material adorned with them! Coulter's have assembled this collection earlier than usual this Fall, in order that you may choose at once. Collars of fur in shawl and crush effects, you know, are very new—we want you to see them, soon.

(Main Floor—Coulter's)

2000 Yards of Crash Weave Cretonnes Have Been Reduced to 35c a Yard

Shabby draperies—how they reflect upon your good housekeeping and even perhaps upon your good taste! No need for them, with a featuring of fifty pieces in attractive hues and designs at your command for so little a price Monday.

Odd Pairs of Ruffled Curtains
Have been cut in price a third, as have file panels in small quantities. You certainly are interested.

Bedsreads that Match the Sets, \$7.75
How the ensemble will brighten up your bedrooms, to be sure. And the saving to be made in their purchase on Monday is not to be overlooked.

Ruffled Valance Sets \$3.45 the Set
Five-piece sets, these, in voile, figured Marquisette and figured Organdie; finished either with colored voile or rayon ruffles.

(Second Floor—Coulter's)

Smart Women Will Adore the Subtle Dip of the Hemline on New Fall Coats

Femininity is going to be entranced with the new Coats for Fall, with their useful and decorative pockets that are cleverly placed; their buoyantly youthful look.

Rich, Soft Fur Trimmings
Smooth, supple fabrics; warm, beautiful color-tones—all are going to endear the new Coats to their wearers.

So come expecting to succumb to their thrall, and come soon, while their first newness is so obvious.

A size to fit anyone who wears anything from 12 to 44—which practically runs the gamut of sizes, to be sure.

And a price to pay anywhere between

\$49.50 to \$98.50

(Third Floor—Coulter's)

All Wool Are These New Challis

Which will be staple in women's wardrobes as long as challis are made—there's no material that can take its place. The printed patterns, colors and stripes are fanciful and most attractive; the width, 27 inches; the price, yard...\$1.25 With a 36-inch width, at...\$1.65

1000 Yards of Printed Linens, 90c Yard

Ideal for sports apparel at golf and country clubs, and very much reduced in price on Monday.

(Second Floor—Coulter's)

Opportunity! In a Clearance of Cool Dresses

Simple, but effectively-made dresses of striped wash silks are these; to be had with long or short sleeves, as you prefer; and cleverly tailored.

Several Distinctive Models
Are yours to make selection from, and all are.....Half

Heavy Silk Crepe Dresses

—too, in sleeveless or long sleeve models, here in white, and some of the pastel shades; straight-line or two piece, on sale at.....Half

(Fourth Floor—Coulter's)

Plain and Printed Linen Dresses

—in a pleasing variety of styles—all in sizes 16 to 42—and all, Monday.....Half

Our final riddance of these little groups certainly spells economy for wise women, as well as freedom from sewing.

SOCIETY

BY JUANA NEAL LEVY

Few other Continental cure resorts boast such a diversified, loyal clientele as does Vichy, France. Each year, thousands of men and women flock to their parent city from all far-off places as Australia and California, South Africa and Sweden, for the twenty-one-day cure and the many diversions which go with it.

An unusual feature of this annual influx is that most of the arrivals are French, unusual because in most popular French resorts the majority of visitors is comprised of foreigners. Next to the French, the English probably are the most numerous with the Americans close behind.

The fact that the French are in the lead speaks well for the curative powers of Vichy's famous waters—taken both internally and externally. The fact that English and Americans continue to return year after year denotes the many amusements which enliven the cure period.

The international tennis tournament on the grounds of the Sporting Club de Vichy this year was a great success both as to the number of players and their quality. There were 286 entries.

On the golf course, the flag competition for the prize offered by Mrs. C. P. Wyman was won by a French girl on the eighteenth green. Mr. Browne of New York won the Hoyt Cup with Col. Francis Drake of New York and California a close second.

Mr. and Mrs. William N. Jernegan of Chicago have arrived in Paris and are stopping at the Hotel de Paris after a tour around the world with a party of friends from the United States. Other members of the party are J. W. Walker of Los Angeles, father of Mrs. Jernegan, and Mrs. Hattie Mollay, also of Los Angeles.

Mr. and Mrs. John C. Wichman, who have been traveling in Germany, were recent visitors to Frankfurt, stopping at the Frankfurter Hof.

This is a "fitting season" for luncheon, Germany, the only difficulty felt in the fitting is on the part of the hotel directors. Recent arrivals there from California include Alfred Hara and Edwin Marshall and family of Los Angeles, who are guests of the Hotel Continental.

H. M. Snyder is in Paris for a few weeks on a tour around the world. He plans to spend some time traveling in France.

Mr. and Mrs. William M. Garland and their son, John Jewett Garland, have been at the Hotel George V in Paris, where they returned from the Olympic Games in Amsterdam. Mr. Garland is a member of the International Olympic Committee.

Mrs. Julia Bennett and Mrs. Emily E. Mulholland have arrived in Paris and are stopping at the Hotel Bristol in Berlin.

Mr. and Mrs. Robert J. Baldwin of Santa Barbara, have arrived in Montreux, Switzerland, and will occupy the Villa Casarosa for the remainder of the summer.

Mr. and Mrs. William F. Cox, who crossed on the liner Montreux, are at the Hotel Ritz in Paris.

Mr. and Mrs. William Keith Scott have returned to the Hotel Princesse in Athens in Paris from Brussels after a short sojourn in Belgium. Many American visitors have been seen lately in the crowds at the great Paris exhibition in Cologne, Germany, among them C. A. B. Powell of Pasadena.

An enthusiastic American, Mrs. Oliver Lockner-Lampson, formerly Miss Bianca Paget of Los Angeles, is seen daily with her Parliamentary husband enjoying the water holiday in the Ronds at Coves, Eng.

Mr. and Mrs. Louis Adams of Pasadena, have been in Deauville, France, for the fashionable summer season there.

Clinton G. Abbot of San Diego, was among the recent arrivals at the Hotel Bristol in Berlin.

Mr. and Mrs. C. W. Gates and Miss Elizabeth Steinhart of Pasadena, who recently took the northern cruise, visiting Iceland, the North Cape and Reval among other places, are making a brief stay at the Hotel Adlon in Berlin. Later, they will go to Dresden, Prague, Vienna and Budapest and then visit two or three of the North Italian lakes on their way to Paris, whence they will cross to England and sail for the United States on the 27th inst., aboard the liner Berengaria.

Mr. Gates is a member of the Crossfield Water, Oats firm, an executive company with offices in Chicago for various lumber companies in the Gulf States and on the Pacific Coast, including the Crossfield Lumber Company at Crossfield, Ark.

Among other Californians who recently arrived at the Hotel Adlon in Berlin were John Phillips and O. D. Read of Los Angeles.

Mr. and Mrs. P. C. Young have been in Wiesbaden, Germany, for the cure season there, stopping at the Hotel Nassauer.

Miss Anna C. Stewart of Long Beach, who crossed to Europe on the liner America, recently, will spend the next year abroad.

Alden W. Skinner will go to Lugano, Switzerland, October 1, next, aboard the President Wilson for Boston, passing a few days there then on to Washington, Philadelphia and New York, sailing December 6, next, on the President Hayes for the Pacific Coast due at Los Angeles the October 23, next. He plans to pass the winter at Hotel Hollywood. Mr. Skinner has met many friends from home during his travels abroad.

HEALTH AND DETESTABLE ADVICE

By Dr. Frank Mc Coy

Dr. Mc Coy will answer personal questions on health and diet, addressed to him, care of The Los Angeles Times. Inquiries stamped, addressed, envelope for reply.

MANY CAUSES OF CONSTIPATION

Constipation, perhaps the most usual ailment of the human family, undoubtedly leads to a serious self-poisoning from the toxins of putrefying, uneliminated waste products. The toxins of this disorder have been blamed by physicians for starting a large variety of disorders, from alopecia (loss of hair) to tarsalgia (neuralgia of the foot).

People having one movement per day do not usually consider themselves constipated, and yet they may be seriously affected by intestinal poisoning because this movement may be only two or three days late, or it may be only partially complete. It is possible for a portion of the bowel contents to be retained in a pouch-like condition, leaving the older material to putrefy and poison the body.

Constipation is usually a very chronic disorder of years' standing, sometimes present in some degree from birth to death. The causes of constipation are numerous. The diet of our modern civilization is most at fault, since we use too many of the soft, mushy foods that do not provide enough bulky material for the bowels to act upon, and we also use these sloppy foods in such bad combinations and quantities that they readily ferment, producing a gas that balloons the bowels.

These fermenting and decaying foods produce an inflammation of the intestinal lining that seriously interferes with the passage of the food material. The gas pressure and inflammation often lead to some abnormality of the shape or position of the bowel, and weaken the constructive muscles of the intestines so that they have not enough strength to propel the feces forward.

Inflammation of long standing sometimes reduces the lubricating material of the bowels and interferes with the internal sliding process or propulsion. Many people use a diet that is far too dry, and others have a peculiar habit of eating that absorbs too much moisture. In either case the intestine finds difficulty in pushing forward the waste to be expelled.

Q: Mrs. A. B. asks: "Will you please tell me what benefit I will receive from eating a dish of raw carrots every day?"

A: The raw carrot is an excellent salad vegetable containing several of the most important organic salts and vitamins. Due to the organic arsenic, raw carrots make an excellent remedy for improving bad, pimply complexion.

Q: Mrs. A. B. asks: "Will you please tell me what the hepatic disorder is?"

A: Such disorders are derangements of the functions of the gall bladder and its accessory organs, gall bladder inflammation, enlarged liver, cirrhosis, cancer of the liver, etc.

Of course, he had applied for a post in a tourist agency and his only fear was because he did not speak any foreign language.

Well, supporting we want to send you to our Paris office," said the manager, who seemed impressed by the man's appearance. "Parlez-vous Français?"

"What?" asked the young man. "Parlez-vous Français?" the manager repeated.

"Sorry, I don't quite get you," "Oh, yes," exclaimed the other, "perfectly"—(The End).

Mr. and Mrs. Robert J. Baldwin of Santa Barbara, have arrived in Montreux, Switzerland, and will occupy the Villa Casarosa for the remainder of the summer.

Mr. and Mrs. William F. Cox, who crossed on the liner Montreux, are at the Hotel Ritz in Paris.

Mr. and Mrs. William Keith Scott have returned to the Hotel Princesse in Athens in Paris from Brussels after a short sojourn in Belgium.

Many American visitors have been seen lately in the crowds at the great Paris exhibition in Cologne, Germany, among them C. A. B. Powell of Pasadena.

An enthusiastic American, Mrs. Oliver Lockner-Lampson, formerly Miss Bianca Paget of Los Angeles, is seen daily with her Parliamentary husband enjoying the water holiday in the Ronds at Coves, Eng.

Mr. and Mrs. Louis Adams of Pasadena, have been in Deauville, France, for the fashionable summer season there.

Clinton G. Abbot of San Diego, was among the recent arrivals at the Hotel Bristol in Berlin.

Mr. and Mrs. C. W. Gates and Miss Elizabeth Steinhart of Pasadena, who recently took the northern cruise, visiting Iceland, the North Cape and Reval among other places, are making a brief stay at the Hotel Adlon in Berlin. Later, they will go to Dresden, Prague, Vienna and Budapest and then visit two or three of the North Italian lakes on their way to Paris, whence they will cross to England and sail for the United States on the 27th inst., aboard the liner Berengaria.

YOUR BABY AND MINE

By Myrtle Meyer Eldred

Mrs. Eldred will be glad to answer all questions pertaining to babies and mothers, forwarded to this column, stamped and addressed, envelope for reply.

This department offers advice on various subjects, such as: the new baby, sleeping, walking, teething, nursing, weaning, etc. It also gives information on the health of the mother and the baby, and on the proper care of the baby.

Readers offer some good suggestions. Mrs. M. P. writes: "One of my children had such a persistent case of cradle cap that it seemed impossible to get rid of it."

Answer: I am always interested in hearing of the different remedies mothers use to combat some of these ailments suffered by children.

Another suggested remedy that interested me was the use of borax on a wet cloth, which also caused the scurf to disappear and never return.

It is my personal opinion, and I wish just that, that the average case of cradle cap is due to a collection of dirt and grease which gathers because of the mother's fingerings in cleaning the "soft spot" otherwise why does cradle cap almost invariably appear just here and on no other portion of the head?

One cupful of freshened codfish, two cupfuls of raw potatoes, two cupfuls of milk, two eggs, one tablespoonful of butter, salt, pepper, and a dash of onion powder. Place the fish and potatoes in a saucepan and add enough boiling water to just cover, let simmer until the potatoes are cooked; drain thoroughly, mash well, and scraped meat in the child's diet, and the doctor who advocated this made this clear to the mother, but found it expedient to advise it when this unusual situation arose. A very wise doctor, we think.

Persian Art Critic Will Talk Here. Dr. Kahn to Appear Daily at Store Where Rare Rugs Will be Exhibited.

Trade's drab routine must make way for art for a short while each day this week when Dr. Ali-Kull Khan, art connoisseur and collector, comes to Bullock's for a series of six lectures on Persian fine arts and Persian general culture.

The lectures will begin today, one at 11 a.m. and another at 3 p.m., and every morning for the remainder of the week, except Saturday, at 11 a.m. Dr. Kahn will be on the sixth floor of the store to continue his talks.

The lectures are being given in conjunction with a collection of ancient Persian rugs which has just been received at Bullock's, and which is said to be the best and largest exhibition of its kind ever brought to the West.

In a group of some 3000 rugs of varied sizes there are seventy-five large carpets which are exceptionally rare and are believed to be approximately 125 to 150 years of age. In the collection there also is a prayer rug supposed to be one of six similar ones in existence.

Dr. Khan has come from New York to establish Pacific Coast headquarters in San Francisco. In addition to being considered the foremost authority on Persian fine art in America, an orator and lecturer, he also is a prayer rug collector.

Each night, do this: Enlarge them—cause blackheads, if left in the skin. The mild oil in Palmolive lather gently free the skin of these burdens, keep texture fine and pores unobscured.

Without fail, do this: Enlarge them—cause blackheads, if left in the skin. The mild oil in Palmolive lather gently free the skin of these burdens, keep texture fine and pores unobscured.

CHEF WYMAN'S Suggestions for TOMORROW'S MENU

Every Tuesday and Friday at 3 o'clock Mrs. A. L. Wyman will conduct a free class and demonstration of good cooking in the lecture room of the Southwest Building, 120 South Broadway.

Breakfast: French Toast, Shredded Eggs and Bananas, Whole Wheat Scones, Plum Jam, Coffee.

Lunch: Codfish Souffle, Boiled Potatoes, Chiffonade Salad, French Dressing, Pear Purée, Iced Tea.

Dinner: Swiss Soup, Pickles, Dutch Stew, Green Corn, Beef Staked, Mayonnaise, French Souffle, Coffee.

Whole Wheat Scones: Mix three cupfuls of whole wheat flour with one cupful of white flour, six level teaspoonfuls of baking powder, half a teaspoonful of salt, and two teaspoonfuls of sugar.

Francisco Souffle: Place in a saucepan three tablespoonfuls of butter, melt and rub smooth with four tablespoonfuls of flour, beat in slowly one cupful of milk, and stir until smooth and thick.

Codfish Souffle: One cupful of freshened codfish, two cupfuls of raw potatoes, two cupfuls of milk, two eggs, one tablespoonful of butter, salt, pepper, and a dash of onion powder.

Beef Stew: Scraped meat in the child's diet, and the doctor who advocated this made this clear to the mother, but found it expedient to advise it when this unusual situation arose. A very wise doctor, we think.

Persian Art Critic Will Talk Here. Dr. Kahn to Appear Daily at Store Where Rare Rugs Will be Exhibited.

Trade's drab routine must make way for art for a short while each day this week when Dr. Ali-Kull Khan, art connoisseur and collector, comes to Bullock's for a series of six lectures on Persian fine arts and Persian general culture.

The lectures will begin today, one at 11 a.m. and another at 3 p.m., and every morning for the remainder of the week, except Saturday, at 11 a.m. Dr. Kahn will be on the sixth floor of the store to continue his talks.

The lectures are being given in conjunction with a collection of ancient Persian rugs which has just been received at Bullock's, and which is said to be the best and largest exhibition of its kind ever brought to the West.

In a group of some 3000 rugs of varied sizes there are seventy-five large carpets which are exceptionally rare and are believed to be approximately 125 to 150 years of age. In the collection there also is a prayer rug supposed to be one of six similar ones in existence.

Dr. Khan has come from New York to establish Pacific Coast headquarters in San Francisco. In addition to being considered the foremost authority on Persian fine art in America, an orator and lecturer, he also is a prayer rug collector.

Each night, do this: Enlarge them—cause blackheads, if left in the skin. The mild oil in Palmolive lather gently free the skin of these burdens, keep texture fine and pores unobscured.

Without fail, do this: Enlarge them—cause blackheads, if left in the skin. The mild oil in Palmolive lather gently free the skin of these burdens, keep texture fine and pores unobscured.

HOUSEHOLD SUGGESTIONS

Good for Him

Let the youngster eat plenty of butter. So many mothers are so particular about "wasting butter" with children and watch them carefully when they spread their bread, or else butter it for them. The child who eats plenty of butter is by no means wasting it, as it is splendid for him. Economize on the candy and ice cream comes permitted him and let him have the butter.

The Gas Question: Do you ever clean out the burner of the gas stove? Do you allow articles to boil furiously instead of turning down the flame?

Do you use a large burner on the gas stove when a smaller one will serve as well? Do you plan your meals so that the oven will frequently cook the entire meal with one burner?

Do you report to the gas company when the flame burns a wasteful yellow flame? Do you use a large burner on the gas stove when a smaller one will serve as well?

Do you allow articles to boil furiously instead of turning down the flame? Do you use a large burner on the gas stove when a smaller one will serve as well?

Do you plan your meals so that the oven will frequently cook the entire meal with one burner? Do you report to the gas company when the flame burns a wasteful yellow flame?

BILTMORE
NOW
CICIL B. MILLER
THE GODLESS GIRL
STORY BY JEANIE MACPHERSON
SYMPHONY ORCHESTRA

The LAST WORD
By ALMA WHITAKER
ONE KIND OF SERMON

Long ago I remember a young girl who used to sing temperance songs at all sorts of meetings. Her songs were always story songs, about the misery of the home in which there was a drunken father. They were strong on father drinking and the misery that came to the family because of it. She was a broken-hearted mother with starving babies awaiting father's return from the corner saloon. She was a earnest little girl who sang these songs with all her heart, and people used to come up and sign the pledge by the dozen because of them. When she died at the age of 22, actually hundreds of poor people attended her funeral and strewed her grave with little bouquets of flowers. Any number of people who have helped to save their unhappy homes from the demon rum.

Will Make-Up Harm?
That depends on how you remove it

Use cosmetics if you wish that remove them with a good beauty oil blended in this gentle soap to safeguard natural loveliness. Ask any beauty specialist and you'll be told: "Never leave powder and rouge on your skin over night." A great majority advocate the use of beauty oils for the gentle daily cleaning of the skin. Each day use the soothing oils of palm and olive in the lather of Palmolive Soap. It is a true complexion soap made for one purpose only. Youthful, clean, fresh radiance follows its regular use. The day's accumulation of grime and dirt, of cosmetics, clog the pores, enlarge them—cause blackheads, if left in the skin. The mild oil in Palmolive lather gently free the skin of these burdens, keep texture fine and pores unobscured. Each night, do this: Enlarge them—cause blackheads, if left in the skin. The mild oil in Palmolive lather gently free the skin of these burdens, keep texture fine and pores unobscured. Without fail, do this: Enlarge them—cause blackheads, if left in the skin. The mild oil in Palmolive lather gently free the skin of these burdens, keep texture fine and pores unobscured.

AIR RACES WILL BE BROADCAST

Three Stations to Report Mines Field Events

Radio Proving Great Aid to Aviation Progress

Equipment for Transoceanic Flights Discussed

BY DR. RALPH L. POWER.
The National Air Races and Exposition at Mines Field this week, as announced previously, will be broadcast with word descriptions and band music by KMIC, Inglewood, from 10 a. m. to 10 p. m. and by two Los Angeles stations, KPLA and KFI, each afternoon from 1 to 4 o'clock.

Besides this regular broadcast activity, radio is more and more proving of valuable assistance to aviation. Yet a misconception has arisen in the minds of many. In brief, short waves are not good for the air service.

The record of Russell and Cramer, lost in the vicinity of Labrador last month in an attempted flight in the Greater Rockford from Rockford, Ill. to Stockholm, Sweden, might not have been delayed had the plane been equipped with a transmitter capable of operating on intermediate frequencies, is the belief of Navy Department officials.

BYRD PLANE WELL-FITTED
The same government department has rather closely followed the various transoceanic flights and has considered with interest the wave lengths used by various planes. The short waves give long distance, but because they require special watches and the fact that there are skip distance zones where the signals are not heard, they cannot be depended on to obtain assistance from all near-by stations. At the same time the direction finders now in vogue cannot be used to take bearings on short-wave transmission.

As a result of the radio equipment in various planes that have made long flights, the Byrd trans-Atlantic plane America, was equipped with a radio capable of transmitting on 500 kilocycles (500 meters) and the plane was heard by merchant vessels and shore radio stations throughout its flight.

The British flying boat of Capt. Courtney also had a medium-wave set and this type of equipment undoubtedly was the principal cause of the early rescue of the crew.

The Navy Department always equips its long-range planes with sets capable of transmitting on the distress frequency of 500 kilocycles. This frequency is guarded by all vessels, and by most shore radio stations and radio compasses can be used to get bearings of the planes' transmission.

On two separate occasions Clarence H. Schildhauer, lieutenant U.S.N., has used intermediate frequencies to obtain assistance from naval and merchant vessels. The Navy Department has sent a number of marine transport land planes from Miami, Fla. to Managua, Nicaragua. At all times the exact whereabouts of the planes were known.

GOOD SENDING RADIOS

The daylight transmitting distance of the radio transmitter used by the plane America may be conservatively taken as 500 miles. The plane was heard more than 1000 miles and a Navy plane, using the same type equipment, was worked more than 1200 miles.

High frequencies are useful for working long distances to special stations. Where high and intermediate frequencies both can be obtained from the same set, with little increase in weight, the high-frequency set should prove useful. If, because of weight limitations, a choice must be made between high and intermediate frequency sets for planes engaged in transoceanic work, the intermediate frequency set capable of transmitting on the distress frequency of 500 kilocycles should be chosen.

The Greater Rockford carried a high-frequency set and, although the range of signals was greater than intermediate frequency and the apparatus gave an interesting account of itself, the various radio stations along the Canadian and Greenland coasts could not hear the plane nor could they obtain radio bearings on it.

THREE STUDIOS FOR CHICAGO STATION

CHICAGO, Sept. 9.—Three studios will be used by WMAQ, Chicago, on completion of the twenty-five-story home of the Chicago Daily News. One of the studios, two stories in height, will be arranged to care for large groups of artists. Onlookers may see the performers through plate-glass partitions, hearing at the same time through the medium of loud speakers.

OLYMPICS HERE TO BE GREATEST

Athletic Official Makes Forecast for 1932

Ornstein Says Other Nations Training Harder

Prophecy Given Much Prominence in East

In an interview published in the Washington (D. C.) Daily News, Charles L. Ornstein, American athletic official, who has just returned from the world Olympic Games of last month at Amsterdam, predicts that the next world Olympiad, which will be held in Los Angeles in 1932, will be the greatest of all. A copy of the paper in which the interview appears reached this city yesterday.

"Any impression," Ornstein is quoted as saying, "that the 1932 world games will be a walk-away for the United States team because Los Angeles is a long way from Europe is all wrong. Every four years the games are harder to win, because other nations and taking them more seriously, improving their training methods and developing more talent, and Los Angeles will not see a walk-away for the U. S. A."

A suggestion is made by Ornstein for an innovation at Los Angeles in the method of reception of victors in the various contests. At Amsterdam, as at previous world Olympic Games, the winners merely walked off the field, waving their hands to the cheering grand stand. At Los Angeles in 1932 Ornstein would like to see the victors escorted to the most honored reviewing box and there crowned publicly with a wreath.

The Washington paper gave the Ornstein interview a five-column head reading "Los Angeles to Have Greatest Olympics in 1932." The prominence thus given the article was pointed to by local officials as showing the great national interest already being taken in the 1932 world games in this city. It was emphasized, also, that Proposition No. 2 on the November election ballot must be carried in order that the State's proposed aid of \$1,000,000 to stage the games adequately and creditably to California be made available.

GIRL FOUND AT MUSEUM IDENTIFIED

Former Employer Tells of Seeing Bullet Victim Shortly Before Death

Identification of the body of a young woman found beneath a balcony of the Southwest Museum late Saturday afternoon with a bullet wound in the head was made by police yesterday as that of Miss Elizabeth Jordan of San Diego. The identification was made through information obtained from Norton Stuart, curator of the Museum of Natural History at Santa Barbara, who told police he was the companion seen by several persons with Miss Jordan at the museum a short time before the body was discovered, and Mr. and Mrs. P. E. Jordan of 850 Ninth street, San Diego, parents of the dead girl, who arrived here yesterday.

Stuart was returned here last night by Detective Lieutenant Condruff and Curry for questioning. He explained his actions and departure from the museum. He was not held, but will remain here today for a conference with police and parents.

Early yesterday Stuart walked into the Santa Barbara police station and told officers he recognized Miss Jordan and himself in published reports of her death and was ready to be questioned. He admitted, police state, he met Miss Jordan in the Santa Barbara museum and that they had visited the museum, but denied any knowledge of her death.

The young woman, formerly employed in the Santa Barbara museum as Stuart's secretary, several times threatened suicide, he said, but not on Saturday. He denied any quarrel with her.

Coroner Signs Certificates in Dual Tragedy

Coroner Nance yesterday signed certificates of murder and suicide in the case of Mrs. Bertha Kirk and Capt. Halsey James Pepper, middle-aged Hollywood film player, whose romance ended late Saturday night when the man is asserted to have killed the woman and then to have turned the gun on himself.

Both were married. Pepper was an Englishman, having come here six years ago, since which time he has worked steadily in motion pictures. He was 54 years of age, and she was 45.

The woman's body was claimed by her sister, Catherine Wilson of 1215 Lodi Place. It was removed to Pierce Brothers' mortuary. Funeral arrangements have not been made for either body.

Cool Southwest Wind Reduces Temperature

Los Angeles experienced the coolest day since the peak temperature of 96 deg., registered last Thursday, when, at 1 p. m., yesterday, the mercury just reached 81 deg. on the official thermometer, according to the United States Weather Bureau office. Likewise, the day also was the coolest, registering at 6 a. m. just 61 deg.

A cool southwest wind commencing at 7 a. m. dissipated clouds which had gathered during the night, and, changing to a southwest direction in the afternoon, helped to hold down the heat to just 1 deg. above normal. By 5 o'clock, the thermometer showed only 73 deg. Fair and warm weather is forecast for today, with the expectation that it will continue the same all this week.

SPORTS CENTER
AT PORT URGEDSan Pedro Chamber Back of
Trona Field ProposalPurchase of Additional Land
by City Also AskedPlayground for Fleet as Well
as Public Suggested

Acquisition by the city of Trona Field and many adjacent acres at San Pedro as a huge playground for the battle fleet and civilians is a proposal of the San Pedro Chamber of Commerce which has reached the hands of Charles Lamb, secretary of the Playground Commission. Details are expected to be worked out next week for submission to the commission.

In general terms the project contemplates the purchase of twenty-seven acres between Thirtieth and Thirty-sixth streets, east of Pacific avenue, and now held by the Southern Pacific Railway Company. Trona Field, now under lease to the Navy, comprises part of the tract.

The enlarged acreage would afford several football fields, baseball diamonds, tennis courts, croquet grounds, and other sports grounds and sandboxes and even a few horseback-riding paths. While the facilities would be for use by the public, certain of the larger athletic fields could be allotted to the naval forces, during the seasons the battleships are in port. Roy H. Beaton, secretary of the San Pedro chamber, reports having the verbal approval of Secretary of the Navy Willbur to the proposal.

The method of financing the project has not been decided except that it obviously will require a bond issue. As an athletic field is declared to be a material inducement in holding the fleet at Los Angeles Harbor, the project is regarded as of interest to the entire city and the bond district may be determined accordingly. The cost with grandstands and all equipment is estimated at \$500,000 or more.

When an ocean liner was recently docked at Tilbury, Eng., after lying for several years off Southend, 100 tons of mussels were removed from its hull.
